What emerges is a highly informative look at the religious, political, and social spheres of the modern Islamic world. Naturally, readers will find many entries on topics of intense current interest, such as terrorism and the Taliban, Osama bin Laden and al-Qaida, the PLO and HAMAS. But the coverage goes well beyond recent headlines. There are biographical profiles, ranging from Naguib Mahfouz (the Nobel Prize winner from Egypt) to Malcolm X, including political leaders, influential thinkers, poets, scientists, and writers. Other entries cover major political movements, militant groups, and religious sects as well as terms from Islamic law,

culture, and religion, key historical events, and important landmarks (such as Mecca and Medina). A series of entries looks at Islam in individual nations, such as Afghanistan, the West Bank and Gaza, Bosnia-Herzegovina, and the United States, and the

Oilfield Microbiology - Torben Lund Skovhus 2019-03-29

Microorganisms can be both beneficial and harmful to the oil and gas industry and therefore there is an increasing need for the oil industry to characterize, quantify and monitor microbial communities in real time. Oilfield Microbiology offers a fundamental insight into how molecular microbiological methods have enabled researchers in the field to analyze and quantify in situ microbial communities and their activities in response to changing environmental conditions. Such information is fundamental to the oil industry to employ more directed, cost-effective strategies to prevent the major problems associated with deleterious microbial activities (e.g., souring and biocorrosion), as well as to encourage beneficial microbe activity (e.g. oil bioremediation). The aim of the book is to understand how the technological advances in molecular microbiological methods over the last two decades are now being utilized by the oil industry to address the key issues faced by the sector. This book contains a comprehensive collection of chapters written by invited experts in the field from academia and industry and provides a solid foundation of the importance of microbes to the oil and gas industry. It is aimed at microbial ecologists, molecular biologists, operators, engineers, chemists, and academics involved in the sector.

Psikologi Belajar - Afi Parnawi 2019-04-10 Belajar adalah suatu kata yang sudah akrab dengan semua lapisan masyarakat. Whittaker, misalnya, merumuskan belajar sebagai proses di mana tingkah laku ditimbulkan atau diubah melalui latihan atau pengalaman. The Reconciliation of the Fundamentals of Islamic Law - Ibrahim Ibn Al-Shatibi 2015-03-27 The Reconciliation of the Fundamentals of Islamic Law or Al-Muwafaqat fi Usul al-Shari'a, written by Ibrahim ibn Musa Abu Ishaq al-Shatibi, is an innovation in Islamic jurisprudence, for it was for the first time that the objectives of shari'a were addressed, as they are in this book. The book is an authority in understanding the objectives of the shari'a. The difficulty that some may find in comprehending some of its parts may be attributed to the fact that it was the first time that the codification of the maqasid or objectives of the shari'a was undertaken. It was first published in 1884 in Tunis, and since then it has been a source of inspiration, moderation and renewal in fiqh. The book, however, deals with much more than the maqasid, and substantial research is needed to unravel its full contribution. The book is divided into five parts: the fundamental concepts of the discipline; the ahkam (rules) and what is related to them; the legal purposes of the shari'a and the ahkam related to them; the comprehensive treatment of the adilla (evidences); and the rules of ijtihad and taqlid." Volume I dealt with the first two parts, and this volume covers the third part, dealing with the purposes of shari'a.
