Practical Guide to SAP S/4HANA Controlling -

Nora Voigt 2022-10-06

With SAP Fiori, SAP S/4HANA offers a modern user interface and a simplified new technical data model. The objectives are faster closing and improved performance for reconciliation activities. Using an example manufacturing company, this book presents the resulting new features for the area of Controlling. In addition to the process-related view of the workflows within the company, the book takes a practical look at the SAP Fiori apps in Controlling. You quickly get an overview of the

most important innovations, changed Customizing settings, and current developments in all subcomponents in SAP S/4HANA Controlling. Readers who do not have much experience with HANA yet can first familiarize themselves with the new SAP Fiori interface before turning to the new (simplified) data structures of S/4HANA in Financials and Controlling, as well as the changes to master data and processes. You then follow the example company SPEED GmbH through central structures and processes in Product Cost Controlling. The author also looks at the integration of processes, allocations in SAP Controlling, current developments in Profitability Analysis, and planning and reporting with SAP S/4HANA. - New features in Controlling with SAP S/4HANA - Overview of the functions of all subcomponents - Effects of S/4HANA on your business processes - Practical explanations using a continuous example Demand Driven Material Requirements Planning - Carol Ptak 2018-02-15

In the 1950s, a method called Material Requirements Planning (or "MRP") changed the world of manufacturing forever. But times have changed--customer tolerance times are shorter, product variety and complexity has increased, and supply chains have spread around the world. MRP is dramatically failing in this "New Normal."

Demand Driven Material Requirements Planning (DDMRP), Version 2 presents a practical, proven, and emerging method for supply chain planning and execution that effectively brings the 1950s concept into the modern era. The foundation of DDMRP is based upon the connection between the creation, protection, and acceleration of the flow of relevant materials and information to drive returns on asset performance in the New Normal. Using an innovative multi-echelon "Position, Protect and Pull" approach, DDMRP helps plan and manage inventories and materials in today's more complex supply scenarios, with attention being paid to ownership, the market, engineering, sales, and the supply base. It enables a company to decouple forecast error from supply order generation and build in line to actual market requirements, and promotes better and quicker decisions and actions at the planning and execution level. DDMRP is already in use by MAJOR Global 1000 companies. This book is THE definitive work on DDMRP, and will be required as courseware for all those taking the Certified Demand Driven Planner (CDDP) Program. New Features in Version 2 Completely new Chapter 13, introducing the Demand Driven Adaptive Enterprise (DDAE) Model New Appendix E: The Innovations of DDMRP New and revised graphics scattered throughout the book
