**Up in the Air** - Greg J. Bamber 2013-07-15

"And you thought the passengers were mad. Airline employees are fed up, too-with pay cuts, increased workloads and management's miserly ways, which leave workers to explain to

often-enraged passengers why flying has become such a miserable experience."—The New York Times, December 22, 2007 When both an industry's workers and its customers report high and rising frustration with the way they are being treated,

something is fundamentally wrong. In response to these conditions, many of the world's airlines have made ever-deeper cuts in services and their workforces. Is it too much to expect airlines, or any other enterprise, to provide a fair return to investors, high-quality reliable service to their customers, and good jobs for their employees? Measured against these three expectations, the airline industry is failing. In the first five years of the twenty-first century alone, U.S. airlines lost a total of \$30 billion while shedding 100,000 jobs, forcing the remaining workers to give up over \$15 billion in wages and benefits. Combined with plummeting employee morale, shortages of air traffic controllers, and increased congestion and

flight delays, a total collapse of the industry may be coming. Is this state of affairs inevitable? Or is it possible to design a more sustainable, less volatile industry that better balances the objectives of customers, investors, employees, and the wider society? Does deregulation imply total abrogation of government's responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis? Greg J. Bamber, Jody Hoffer Gittell, Thomas A. Kochan, and Andrew von Nordenflycht explore such questions in a well-informed and engaging way, using a mix of quantitative evidence and qualitative studies of airlines from North America, Asia, Australia, and Europe. Up in the Air provides

clear and realistic strategies for achieving a better, more equitable balance among the interests of customers, employees, and shareholders.

Specifically, the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high-quality service, labor relations policies that avoid long drawn-out conflicts in negotiating new agreements, and business strategies that can sustain investor, employee, and customer support through the ups and downs of business cycles.

**Nuts!** - Kevin Freiberg 1998-02-17

Twenty-five years ago, Herb Kelleher reinvented air travel when he founded Southwest Airlines, where the planes are painted like killer whales, a typical company maxim is "Hire people with a sense of humor," and in-flight meals are never served-- just sixty million bags of peanuts a year. By sidestepping "reengineering," "total quality management," and other management philosophies and employing its own brand of business success, Kelleher's airline has turned a profit for twenty-four consecutive years and seen its stock soar 300 percent since 1990. Today, Southwest is the safest airline in the world and ranks number one in the industry for service,

on-time performance, and lowest employee turnover rate; and Fortune magazine has twice ranked Southwest one of the ten best companies to work for in America. How do they do it? With unlimited access to the people and inside documents of Southwest Airlines, authors Kevin and Jackie Freiberg share the secrets behind the greatest success story in commercial aviation. Read it and discover how to transfer the Southwest inspiration to your own business and personal life.

90 Minutes at Entebbe - William Stevenson  
2015-01-06

The incredible story of an Israeli mission that rescued 103 hostages from a hijacked jetliner. On June 27, 1976, Air France Flight 139 was hijacked by terrorists and flown to Entebbe Airport in Uganda. In the following agonizing days, Israeli passengers were singled out and held hostage. A week later on July 4, one hundred Israeli commandos raced 2,500 miles from Israel to Entebbe, landed in the middle of the night, and in a heart-stopping mission that lasted ninety minutes, killed all guerillas and freed 103 hostages. In captivating detail, Stevenson provides a fast-paced hour-by-hour

narration from the hijacking to the final ninety-minute mission. In addition to discussing the incredible rescue itself, Stevenson also covers the political backdrop behind the hijacking, especially Ugandan President Idi Amin's support for the hijackers, which marked one of the first times a leader of a nation had backed terrorist activities. An illustration of one nation's undying spirit, heroism, and commitment to its people in the face of threat, Operation Thunderbolt has become a legendary antiterrorist tale. Although first written in 1976 (and published within weeks of the event), Stevenson's account presents this act of terrorism in a way that is still relevant in our modern-day political climate. A

factual account of what could easily be read as sensational fiction, 90 Minutes at Entebbe will inspire, encourage, and instill hope in all readers. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

Ryanair - Siobhán  
Creton 2005

The supercharged growth of this low-cost airline has actually changed the way countless people live their lives, whether it be Ireland's new "Ryanair Generation," for whom its cheap flights to Dublin have eliminated much permanent emigration to the UK, or the thousands of Britons now enabled to buy holiday homes in rural France. This is the first book to tell the full story of the Ryanair phenomenon, from its inauspicious beginnings to its current dominance, from the secret of its business strategy to its cavalier stunts and practices. Siobhan Creton has spoken to Ryanair employees past and present, as well as

its top management and those at its major rivals like British Airways and easyJet, to produce an authoritative, objective, and compulsive account of one of the most colorful companies in Europe.

**Panic Free** - Tom Bunn 2019-04-30

"HURRY, BUY THE BOOK AND TRANSFORM YOUR LIFE." -

Marla Friedman, PsyD, PC, board chairman, Badge of Life What if you could stop panic by tapping into a different part of your brain?

After years of working to help sufferers of panic and anxiety, licensed therapist (and pilot) Tom Bunn discovered a highly effective solution that utilizes a part of the brain not affected by the stress hormones that bombard a person experiencing panic. This "unconscious procedural

memory" can be programmed to control panic by preventing the release of stress hormones and activating the parasympathetic nervous system. This process, outlined in *Panic Free*, sounds complicated but is not, requiring just ten days and no drugs or doctors. Bunn includes specific instructions for dealing with common panic triggers, such as airplane travel, bridges, MRIs, and tunnels. Because panic is profoundly life-limiting, the program Bunn offers can be a real life-changer.

**Encyclopedia of African Airlines** - Ben R.

Guttery 1998-01-01

The rainy season, terrain, and financial hardships have made the construction of highways and railroads nearly impossible in many parts of Africa. This lack of modern infrastructure

has been overcome in some part by the development of air transportation. Hundreds of carriers--both small and large, government owned and private--have connected all parts of the continent. Together, they have had a tremendous impact on the African economy and the people. Country-by-country, this comprehensive reference work provides brief histories of over 700 airlines in 54 African nations. Each entry has the years of operation of the carrier, along with information on its origin, growth, and route structure. Aircraft usage, including registration numbers and nicknames, is covered in many cases. Any crashes involving aircraft in the carrier's fleet are also noted. An appendix gives the location of all major African

airports.

Ask the Pilot - Patrick Smith 2004

AIRPORTS--UPDATED BY  
LEADING PROFESSIONALS

"With the accelerated rate of change occurring throughout the aviation industry, this edition is a timely and very effective resource for ensuring both airport professionals and those interested in airports acquire a comprehensive understanding of the changes taking place, and how they impact airports and the communities they serve. **The Case Against the Iran Deal** - Alan

Dershowitz 2015-07-29

The lawyer and New York Times–bestselling author of The Case for Israel discusses the pros and cons of the Iran nuclear agreement. An Iranian nuclear arsenal could make the world more dangerous. That is why decisions regarding

Iran's nuclear program are among the most important of our time. Here, Harvard Law Professor Emeritus Alan Dershowitz argues that the negotiations that led to this bad deal were deeply flawed. Evaluating the pros and cons of the Iran nuclear agreement, he asks the fundamental questions about what the deal means, how it will be implemented, and whether we now have the capacity to stop Iran from developing nuclear weapons. As a lawyer with decades of negotiation experience, and a regular commentator on Middle Eastern politics, Dershowitz explains how we could have gotten a better deal, and offers a unique analysis of the Obama administration's negotiations with Iran and the implications of a deal for Israel, the Middle East, and the

global community. It is a call for both intelligent reflection and determined action to stop Iran from getting the bomb.

The Trouble with Islam - Irshad Manji 2007-04-01  
"I have to be honest with you. Islam is on very thin ice with me...Through our screaming self-pity and our conspicuous silences, we Muslims are conspiring against ourselves. We're in crisis and we're dragging the rest of the world with us. If ever there was a moment for an Islamic reformation, it's now. For the love of God, what are we doing about it?" In blunt, provocative, and deeply personal terms, Irshad Manji unearths the troubling cornerstones of mainstream Islam today: tribal insularity, deep-seated anti-Semitism, and an uncritical

acceptance of the Koran as the final, and therefore superior, manifesto of God. In this open letter to Muslims and non-Muslims alike, Manji asks arresting questions. "Who is the real colonizer of Muslims - America or Arabia? Why are we all being held hostage by what's happening between the Palestinians and the Israelis? Why are we squandering the talents of women, fully half of God's creation? What's our excuse for reading the Koran literally when it's so contradictory and ambiguous? Is that a heart attack you're having? Make it fast. Because if more of us don't speak out against the imperialists within Islam, these guys will walk away with the show." Manji offers a practical vision of how the United States and its allies can help

Muslims undertake a reformation that empowers women, promotes respect for religious minorities, and fosters a competition of ideas. Her vision revives Islam's lost tradition of independent thinking. This book will inspire struggling Muslims worldwide to revisit the foundations of their faith. It will also compel non-Muslims to start posing the important questions without fear of being deemed "racists." In more ways than one, *The Trouble with Islam* is a clarion call for a fatwa-free future.

**Level Playing Field for Open Skies** - Peter Paul Fitzgerald 2016-01-18

This book examines the events that have reshaped the international aviation industry between 1992 and 2012. It critically analyzes the major developments and the

regulatory responses, and it highlights some of the incompatible and disjointed regulations that are in effect at either end of international routes. The book proposes that the United States, Canada, the European Union, Australia, and New Zealand form an international organization, to be known as the Open Skies International Aviation Block (OSIAB). OSIAB would be based on expanding the membership of the US-EU Joint Committee foreseen in the 2007 US-EU Open Skies Agreement, as well as expanding its scope to cover every aspect of the regulation of international commercial aviation. The book further argues that such a forum is necessary to ensure that regulations in different countries are aligned so that competitive distortions

potentially caused by regulatory disharmony are minimized, thus allowing the international airline industry to compete on a level international playing field that so many international agreements have promised to create. \*\*\*

Librarians: ebook available \*\*\* "...the contribution of Dr. Fitzgerald's book is twofold. The author has meticulously handpicked the information most apposite to the areas addressed, thus producing a highly informative book, yet, without compromising brevity and focus. Further, this book strikes a fine balance between the seemingly antithetical areas of practical regulation and regulatory theory. On the other hand, the theoretical aspects of regulation are also explored through the

economic framework of market failure and aviation as a public good. ...an essential read for students, scholars and policy-makers with an interest in international aviation, for it has something very meaningful to offer to each audience. For experienced scholars and policy makers, its proposals provide a novel, innovative and thought-provoking perspective for the continuation of the ongoing, but still relatively underdeveloped, discourse in this area."~-- Marios Seretis, *Annals of Air and Space Law*, Vol. XL (Series: Essential Air and Space Law [EASL] - Vol. 15) [Subject: International Law, Aviation Law, Transportation Law, Commercial Law]  
*Aerodynamic Design of*

*Transport Aircraft* - E. Obert 2009-04-16  
The origin of Aerodynamic Design of Transport Aircraft stems from the time when the author was appointed part-time professor in the Aerospace Faculty of Delft University of Technology. At the time his main activities were those of leading the departments of Aerodynamics, Performance and Preliminary Design at Fokker Aircraft Company. The groundwork for this book started in 1987 as a series of lecture notes consisting mainly of pictorial material with a minimum of English explanatory text. After the demise of Fokker in 1996 one feared that interest in aeronautical engineering would strongly diminish. As a result of this, the course was discontinued and the relationship between the author and

the faculty came to an end. Two years later the situation was reappraised, and the interest in aeronautical engineering remained, so the course was reinstated with a former Fokker colleague Ronald Slingerland as lecturer. The lecture notes from these courses form the foundation of this publication.

**Deep Stall** - Philip K. Lawrence 2017-02-27  
Deep Stall applies a framework of strategic analysis to the Boeing Company. Boeing is the world's largest aerospace / defence company, with turnover in the region of US \$60bn. The book examines the relative decline of Boeing in the civil aircraft market in relation to European manufacturer, Airbus. The aim of the book is to utilize the concept of strategic value to explain Boeing's

decline. The authors define this concept as investment in people and technology to leverage future market success by developing innovative new products, arguing that Boeing has neglected strategic value in favour of shareholder value, defined in terms of short-term cash benefits. The rationale for the book exists both in the fact that the story in itself is interesting and also in the wider framework of analysis concerning the correct strategic approach for running a high technology business. The argument illustrates what can happen when quarterly returns become the predominant strategic rationale for a company. In the U.S. the business media (Economist, Forbes, Fortune, and Business Week etc) are now focusing on the

question of Boeing's decline and the major implications for the U.S. national interest. Boeing is one of the jewels in the US technology crown, but today U.S. jobs and capability are being exported abroad, with most of its aircraft program work based in Asia. This is a hot topic in the US which explains why the business media are now so interested in this question. The book sits squarely in the centre of this debate. Deep Stall concludes with a brief analysis of the recent fight-back that has been evident in Boeing's fortunes and the successful campaign to sell the new 787. The authors probe the question of whether Airbus or Boeing is likely to dominate in the next ten or fifteen years.

*Dear Sky* - 2017

Air Koryo is the state-owned national airline of North Korea. International sanctions and environmental restrictions have reduced the airline's international destinations with only China and Vladivostok remaining. The old Antonovs, Ilyushins and Tupolevs rarely fly abroad and therefore seem superfluous. Nevertheless these aircraft and their crews are kept ready for operation. Arthur Mebius monitors the routine operations by the crew which appears as a rehearsed play of maintenance, controls, and procedures. A beautiful ground control dance of which an image of dedication and pride arises. The book is complemented with fictive anecdotes based on true historical events, technical information of the

current fleet and archive material.
