What Hell Is Not - Alessandro D'Avenia 2019-01-24

The school year is finished, exams are over and summer stretches before seventeen-year-old Federico, full of promise and opportunity. But then he accepts a request from one of his teachers to help out at a youth club in the destitute Sicilian neighbourhood of Brancaccio. This narrow tangle of alleyways is controlled by local mafia thugs, but it is also the home of children like Francesco, Maria, Dario, Totò: children with none of Federico's privileges, but with a strength and vitality that changes his life forever. Written in intensely passionate and lyrical prose, What Hell Is Not is the phenomenal Italian bestseller about a man who brought light to one of the darkest corners of Sicily, and who refused to give up on the future of its children.

A World of Nations - William R. Keylor 2009

Now updated to address recent developments in the post-9/11 world, *A World of Nations, Second Edition*, provides an analytical narrative of the origins, evolution, and end of the Cold War. Much more than a simple account of the long struggle between the two superpowers, this vibrant text opens with chapters exploring the development of regional conflicts--ethnic, religious, cultural, economic, and military--that dominated international relations until the breakup of the Soviet Union. The final chapters examine the war on terror and the salience of interstate and transnational conflicts in the era of globalization. In engaging, compelling language, author William R. Keylor provides a genuinely international history of this turbulent period. Designed to serve the needs of both political scientists and historians, the new edition has been reorganized along regional lines while still maintaining the chronological approach of the previous edition. Building on its historical foundation, the second edition discusses International Relation theory and explores such timely critical topics as human rights, environmental issues, NGOs, immigration, and international terrorism. In addition, numerous new photographs and helpful maps animate the text, drawing students into this dynamic subject. Thoroughly revised and even more relevant in its second edition, *A World of Nations* offers a riveting exploration of international relations as they have evolved from the Second World War to the present. It is ideal for political science courses on international relations, as well as courses on the history of U.S. foreign policy, European diplomatic history, the history of international relations, and world history since 1945.

Science in the Kitchen and the Art of Eating Well - Pellegrino Artusi 2003-12-27

First published in 1891, Pellegrino Artusi's *La scienza in cucina e l'arte di mangiar bene* has come to be recognized as the most significant Italian cookbook of modern times. It was reprinted thirteen times and had sold more than 52,000 copies in the years before Artusi's death in 1910, with the number of recipes growing from 475 to 790. And while this figure has not changed, the book has consistently remained in print. Although Artusi was himself of the upper classes and it was doubtful he had ever touched a kitchen utensil or lit a fire under a pot, he wrote the book not for professional chefs, as was the nineteenth-century custom, but for middle-class family cooks: housewives and their domestic helpers. His tone is that of a friendly advisor - humorous and nonchalant. He indulges in witty anecdotes about many of the recipes, describing his experiences and the historical relevance of particular dishes. Artusi's masterpiece is not merely a popular cookbook; it is a landmark work in Italian culture. This English edition (first published by Marsilio Publishers in 1997) features a delightful introduction by Luigi Ballerini that traces the fascinating history of the book and explains its importance in the context of Italian history and politics. The illustrations are by the noted Italian artist Giuliano Della Casa.

"A wonderful read—with all of a fairy tale's leaps and turns and queer, vivid images" by the author of the international bestseller *Raise the Red Lantern* (The Observer). In Peach village, crying was forbidden. But as a child, Binu never learned to hide her tears. Shunned by the villagers, she faced a bleak future until she met Qiliang, an orphan who offered her his hand in marriage. Then, one day, Qiliang disappears. Binu learns that he has been transported hundreds of miles and forced to labor on a project of terrifying ambition and scale—the building of the Great Wall of China. Unwilling to live a life without him, Binu courageously decides to find and save her husband. Inspired by her love, she sets out on an extraordinary journey toward Great Swallow Mountain with only a blind frog for company. What follows is an adventure unlike any she could have ever imagined, in this "gripping, insightful . . . tragic tale of female strength and ultimately, love" (Time Out).
