Livet efter døden i en Nøddeskal - Else Byskov 2021-09-02

Er der liv efter døden? Ja, det er der absolut, for døden er en illusion, og dette liv er ikke det eneste, vi lever. Hvor kommer vi så hen mellem de fysiske liv, hvordan ser en sådan verden hinsides tid og rum ud, og hvad laver vi der? Denne bog, den tredje i Den Spirituelle Nøddeskalsserie, afslører, hvad der sker, når vi dør. Forfatterne præsenterer en ekstraordinær indsigt i den åndelige verden: den verden, der eksisterer før og bag det fysiske plan, den verden der ligger bag sløret, dér hvor alt har sin oprindelse, en verden af harmoni, lyksalighed og kærlighed. Vi skal ikke blive ved med at leve i uvidenhed om den åndelige verden, og denne bog, der er baseret på Martinus' ekstraordinære indsigt i livsmysteriet, løfter sløret, så vi selv kan se, hvad der venter os efter vores fysiske krops død. Den verden, der venter, er en af skønhed, visdom og indsigt og én vi kan glæde os til at passere ind i. Døden er en smuk oplevelse, og det er fantastisk dejligt at dø - vi ved det bare ikke. Så tag et smugkig ind i denne vidunderlige verden, så du bliver vidende om og forberedt på, hvad der venter. Det er en verden, der overstiger dine vildeste drømme.

Death Is An Illusion - Else Byskov 2002-11-18

Martinus will become much more prominent as a spiritual teacher, thanks to

Else Byskov's clear summary of his life and teachings. Death Is An illusion is a timely introduction to the Danish 20th century mystic, Martinus (1890-1981) whose teachings have a sound picture of the cosmos and a perspective about the human future based on the evolution of consciousness. Martinus cosmology is an all-embracing world picture, a spiritual science that describes and analyses the spiritual laws of life. It leads to an optimistic view of life, and it provides the basis for a harmonious and empathetic relationship to all people and all living things.

Consciousness Beyond Life - Pim van Lommel 2010-06-08

In *Consciousness Beyond Life*, the internationally renowned cardiologist Dr. Pim van Lommel offers ground-breaking research into whether or not our consciousness survives the death of our body. If you enjoy books about near-death experiences, such as those by Raymond Moody, Jeffrey Long, and James Van Praagh; watch television shows like *Ghosthunters*, *Touched by an Angel*, and *Ghost Whisperer*; or are interested in works that explore the intersection of faith and science, such as *Spiritual Brain*, *Signature in the Cell*, and *When Science Meets Religion*; you'll find much to ponder in *Consciousness Beyond Life*.

The Black Sun - Stanton Marlan 2008-05-08

Also available in an open-access, full-text edition at <http://oaktrust.library.tamu.edu/handle/1969.1/86080> The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe's Faust, Dante's Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and transformation of the soul. Marlan's original reflections help us to explore the unknown darkness conventionally called the Self. 101 Essays - DiAnn Gilbertson 2021-09-13 In her second compilation of published writing, Brianna Wiest explores pursuing purpose over passion, embracing negative thinking, seeing the wisdom in daily routine, and becoming aware of the

cognitive biases that are creating the way you see your life. This book contains never before seen pieces as well as some of Brianna's most popular essays, all of which just might leave you thinking: this idea changed my life.

Architectural Research Methods - Linda N. Groat 2013-04-03

A practical guide to research for architects and designers—now updated and expanded! From searching for the best glass to prevent glare to determining how clients might react to the color choice for restaurant walls, research is a crucial tool that architects must master in order to effectively address the technical, aesthetic, and behavioral issues that arise in their work. This book's unique coverage of research methods is specifically targeted to help professional designers and researchers better conduct and understand research. Part I explores basic research issues and concepts, and includes chapters on relating theory to method and design to research. Part II gives a comprehensive treatment of specific strategies for investigating built forms. In all, the book covers seven types of research, including historical, qualitative, correlational, experimental, simulation, logical argumentation, and case studies and mixed methods. Features new to this edition include: Strategies for investigation, practical examples, and resources for additional information A look at current trends and innovations in research Coverage of design studio-based research that shows how strategies described in the book can be employed in real life A discussion of digital media and online research New and updated examples of research studies A new chapter on the relationship between design and research Architectural Research Methods is an essential reference for architecture students and researchers as well as architects, interior designers, landscape architects, and building product manufacturers.

Consensus on Peirce's Concept of Habit - Donna E. West 2016-09-12

This book constitutes the first treatment of

C. S. Peirce's unique concept of habit. Habit animated the pragmatists of the 19th and early 20th centuries, who picked up the baton from classical scholars, principally Aristotle. Most prominent among the pragmatists thereafter is Charles Sanders Peirce. In our vernacular, habit connotes a pattern of conduct. Nonetheless, Peirce's concept transcends application to mere regularity or to human conduct; it extends into natural and social phenomena, making cohesive inner and outer worlds. Chapters in this anthology define and amplify Peircean habit; as such, they highlight the dialectic between doubt and belief. Doubt destabilizes habit, leaving open the possibility for new beliefs in the form of habit-change; and without habit-change, the regularity would fall short of habit - conforming to automatic/mechanistic systems. This treatment of habit showcases how, through human agency, innovative regularities of behavior and thought advance the process of making the unconscious conscious. The latter materializes when affordances (invariant habits of physical phenomena) form the basis for modifications in action schemas and modes of reasoning. Further, the book charts how indexical signs in language and action are pivotal in establishing attentional patterns; and how these habits accommodate novel orientations within event templates. It is intended for those interested in Peirce's metaphysic or semiotic, including both senior scholars and students of philosophy and religion, psychology, sociology and anthropology, as well as mathematics, and the natural sciences.

The Origins of Self - Martin P. J. Edwardes
2019-07-22

The Origins of Self explores the role that selfhood plays in defining human society, and each human individual in that society. It considers the genetic and cultural origins of self, the role that self plays in socialisation and language, and the types of self we generate in our individual journeys to and through adulthood. Edwardes argues that other awareness is a relatively early

evolutionary development, present throughout the primate clade and perhaps beyond, but self-awareness is a product of the sharing of social models, something only humans appear to do. The self of which we are aware is not something innate within us, it is a model of our self produced as a response to the models of us offered to us by other people. Edwardes proposes that human construction of selfhood involves seven different types of self. All but one of them are internally generated models, and the only non-model, the actual self, is completely hidden from conscious awareness. We rely on others to tell us about our self, and even to let us know we are a self.

The History of Beyng - Martin Heidegger
2015-11-02

The History of Beyng belongs to a series of Martin Heidegger's reflections from the 1930s that concern how to think about being not merely as a series of occurrences, but as essentially historical or fundamentally as an event. Beginning with Contributions to Philosophy (Of the Event), these texts are important for their meditations on the oblivion and abandonment of being, politics, and race, and for their incisive critique of power, force, and violence. Originally published in 1998 as volume 69 of Heidegger's Complete Works, this English translation opens new avenues for understanding the trajectory of Heidegger's thinking during this crucial time.

Endloses Bewusstsein - Pim van Lommel
2014-01-14

2001 erschien in der international wohl

bedeutendsten medizinischen Zeitschrift "The Lancet" ein aufsehenerregender Artikel. Darin zweifelt der Kardiologe Pim van Lommel die herkömmliche Auffassung von Leben und Tod an. Seine These: Das Bewusstsein ist auch nach neuesten Erkenntnissen der Hirnforschung nicht im Körper lokalisierbar und es hört nach dem Tod nicht auf zu existieren. Van Lommels "aufsehenerregende Studie" (3sat/Kulturzeit) beruht auf internationalen Langzeituntersuchungen und Berichten tausender Patienten, die Nahtoderfahrungen erlebten. Sie ist damit wissenschaftlich vielfach abgestützt!

Approaches and Methodologies in the Social Sciences - Donatella Della Porta 2008-08-28

A revolutionary textbook introducing masters and doctoral students to the major research approaches and methodologies in the social sciences. Written by an outstanding set of scholars, and derived from successful course teaching, this volume will empower students to choose their own approach to research, to justify this approach, and to situate it within the discipline. It addresses questions of ontology, epistemology and philosophy of social science, and proceeds to issues of methodology and research design essential for producing a good research proposal. It also introduces researchers to the main issues of debate and contention in the methodology of social sciences, identifying commonalities, historic continuities and genuine differences.

The Maudsley Reader in Phenomenological Psychiatry - Matthew R. Broome 2012
This unique book brings together and interprets previously hard-to-find texts, new

translations and passages detailing the interplay between philosophy and psychopathology, making them accessible to a new generation of mental health researchers, practitioners and policy makers.

The Social Construction of Reality - Peter L. Berger 2011-04-26

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Cybersemiotics - Søren Brier 2008-01-01
Cybersemiotics not only builds a bridge between science and culture, it provides a framework that encompasses them both.

Investing in Cultural Diversity and Intercultural Dialogue - Unesco 2009-01-01
This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education,

communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

Philosophy of the Information Society - Herbert Hrachovec 2013-05-02

This is the second of two volumes of the proceedings from the 30th International Wittgenstein Symposium in Kirchberg, August 2007. It contains selected contributions on the Philosophy of media, Philosophy of the Internet, on Ethics and the political economy of information society. Also included are papers presented in a workshop on electronic philosophy resources and open source/open access.

From a Culture of Violence to a Culture of Peace - Unesco 1996

Through this volume, UNESCO aims to further reflection on the major changes facing the international community today: how to replace the existing culture of violence with a culture of peace. The text presents contributions by eminent peace researchers, philosophers, jurists and educators on the multiple facets of a culture of peace. The contributors underline the universal nature of a culture of peace - some delve into its very concept, others analyze the manner in which it is achieved, while others concentrate on the global endeavour to which UNESCO is dedicated.

Rational Changes in Science - Joseph C. Pitt 2012-12-06

THE PROBLEMS OF SCIENTIFIC RATIONALITY Fashion is a fickle mistress. Only yesterday scientific rationality enjoyed considerable attention, consideration, and even reverence among philosophers; "but today's fashion leads us to despise it, and the matron, rejected and abandoned as Hecuba, complains; modo maxima rerum, tot generis natisque potens - nunc trahor exui, inops", to cite Kant for our purpose, who cited Ovid for his. Like every fashion,

ours also has its paradoxical aspects, as John Watkins correctly reminds in an essay in this volume. Enthusiasm for science was high among philosophers when significant scientific results were mostly a promise, it declined when that promise became an undeniable reality. Nevertheless, as with the decline of any fashion, even the revolt against scientific rationality has some reasonable grounds. If the taste of the philosophical community has changed so much, it is not due to an incident or a whim. This volume is not about the history of and reasons for this change. Instead, it provides a view of the new emerging image of scientific rationality in both its philosophical and historical aspects. In particular, the aim of the contributions gathered here is to focus on the concept around which the discussions about rationality have mostly taken place: scientific change.

Repetition and Identity - Catherine Pickstock 2013-10-03

A fresh and unusual perspective on the literary, Catherine Pickstock argues that the mystery of things can only be unravelled through the repetitions of fiction, history, inhabited subjectivity, and revealed event.

[Reading Beyond the Lines: A Treatise on Consciousness, Energy, Spirituality and Healing](#) - Liyla S 2022-06-08

On an unsuspecting Friday night, Liyla lost her son to an accident. Lost and disillusioned, all she wanted was a chance to speak to her son again, tell him she loved him and missed him. But death is the end, isn't it? In a mind bending journey through the many planes we humans exist in, Liyla's life changes as she encounters people who help reach across the veil of life and connect her to her son. This event opens a door in her life through which she discovers the meaning of life and beyond. Her studies ranging from contemporary Western sciences to ancient Indian wisdom lead her to understanding what it means to live, and our purpose on this planet along with a clear realization that the universe is just energy. This book will take you on a journey

that answers many questions that have plagued humanity. What exactly is the mind? What is Consciousness? What is destiny? And the biggest one of all-- What happens after our physical forms pass from this life? Liyla looks at these questions with a scientific lens, hoping to bridge the gaps between science and spirituality — for each one of us looks for answers for these same questions within this cosmos. In this book, the spiritual aspects of life are explained with reference to the Panchakosha (five layer) theory of Indian spirituality which is elucidated in the Upanishads and other ancient Indian books. This gives a strong logical basis to understand Consciousness, and life in the physical and subtle planes. [The Natural Law Foundations of Modern Social Theory](#) - Daniel Chernilo 2013-01-31 Daniel Chernilo offers an original reconstruction of the history of universalism in modern social thought from Hobbes to Habermas.

The Speculative Turn - Levi Bryant 2011-01

Continental philosophy has entered a new period of ferment. The long deconstructionist era was followed with a period dominated by Deleuze, which has in turn evolved into a new situation still difficult to define. However, one common thread running through the new brand of continental positions is a renewed attention to materialist and realist options in philosophy. Among the leaders of the established generation, this new focus takes numerous forms. It might be hard to find many shared positions in the writings of Badiou, DeLanda, Laruelle, Latour, Stengers, and i ek, but what is missing from their positions is an obsession with the critique of written texts. All of them elaborate a positive ontology, despite the incompatibility of their results. Meanwhile, the new generation of continental thinkers is pushing these trends still further, as seen in currents ranging from transcendental materialism to the London-based speculative realism movement to new revivals of Derrida. As indicated by the title *The Speculative Turn*, the new currents of

continental philosophy depart from the text-centered hermeneutic models of the past and engage in daring speculations about the nature of reality itself. This anthology assembles authors, of several generations and numerous nationalities, who will be at the centre of debate in continental philosophy for decades to come."

The Language of Organization - Robert Westwood 2001-09-28

The importance of communication for organizations has been an ongoing concern since management was first theorized. Yet language has tended to be viewed as simply a medium of communication - without language per se being theoretically problematized. This book enables a more critical exploration of the major theoretical positions on language and organization, explaining why language warrants a more central and considered place in organization studies. Language and Organization explains how various perspectives on the relationship between language and organization can be represented and explored. Concerned with issues such as power, knowledge and organizational discourse, this book will provide essential new links for a proper conceptualisation and understanding of organizations.

Symbol and Reality - Carl H. Hamburg 2012-12-06

Since prefaces, for the most part, are written after a book is done, yet face the reader before he gets to it, it is perhaps not surprising that we usually find ourselves addressed by a more chastened and qualifying author than we eventually encounter in the ensuing pages. It is, after all, not only some readers, but the writer of a book himself who reads what he has done and failed to do. If the above is the rule, I am no exception to it. The discerning reader need not be told that the following studies differ, not only in the approaches they make to their unifying subject-matter, but also in their precision and thus adequacy of presentation. In addition to the usual reasons for this rather common shortcoming, there is an another one in the

case of the present book. In spite of its comparative brevity, the time-span between its inception and termination covers some twenty years. As a result, some (historical and epistemological) sections reflect my preoccupation with CASSIRER'S early works during student days in Germany and France. When, some ten years later, CASSIRER in a letter expressed "great joy" and anticipation for a more closely supervised continuation of my efforts (which, because of his untimely death, never came to pass), he gave me all the encouragement needed to go to work on a critical exposition of his "symbolic form" concept.

The Downfall of Marriage - Else Byskov
2017-01-30

Do you have marital problems? Do you find it difficult to live in harmony in marriage? Have you never married? Do you think there is something wrong with you for being single or divorced? If your answer is yes, then this book is for you. It reveals the real reason for our relationship problems. There is nothing wrong with you. The reason is an organic / sexual / mental / emotional change that is happening to all human beings as we evolve. Today we are simply not as suitable for marriage as we were in the past. It is time we realize that our sexual pole transformation is recreating us to becoming whole, independent and freedom seeking individuals with a corresponding lesser ability to live in relationships. This book explains the reason for our degenerating ability to live in marriage. It is a helping hand to all those who are confused, insecure and depressed about why their marriages are not working. The book is based on Martinus' clear, logical and intelligent analysis of the transformation of our sexual poles on our way to becoming real, all-loving human beings. This book also reveals the real reason for the existence of homosexuality. The real reason for the growth of same-sex relationships has been a mystery until now. This book is a revelation for anyone who is struggling to understand why they are gay. It is all explained logically in *The*

Downfall of Marriage. Learn why the present state of the world is a result of our unfinished state as emerging humans. Get an intimate look at the bigger picture. It is both mind-blowing and positive. With *The Downfall of Marriage* we are on the leading edge of thought. After reading this book, you will never look at relationships or sexuality in the same way again.

The Spell of the Sensuous - David Abram
2012-10-17

Winner of the International Lannan Literary Award for Nonfiction *Animal tracks, word magic, the speech of stones, the power of letters, and the taste of the wind* all figure prominently in this intellectual tour de force that returns us to our senses and to the sensuous terrain that sustains us. This major work of ecological philosophy startles the senses out of habitual ways of perception. For a thousand generations, human beings viewed themselves as part of the wider community of nature, and they carried on active relationships not only with other people with other animals, plants, and natural objects (including mountains, rivers, winds, and weather patterns) that we have only lately come to think of as "inanimate." How, then, did humans come to sever their ancient reciprocity with the natural world? What will it take for us to recover a sustaining relation with the breathing earth? In *The Spell of the Sensuous* David Abram draws on sources as diverse as the philosophy of Merleau-Ponty, Balinese shamanism, Apache storytelling, and his own experience as an accomplished sleight-of-hand of magician to reveal the subtle dependence of human cognition on the natural environment. He explores the character of perception and excavates the sensual foundations of language, which--even at its most abstract--echoes the calls and cries of the earth. On every page of this lyrical work, Abram weaves his arguments with a passion, a precision, and an intellectual daring that recall such writers as Loren Eiseley, Annie Dillard, and Barry Lopez.

Megayear Future History - David H Wegert
AssDipx3 2018-09-01

This book covers three time periods (Post Mayan Event, 2012 AD): years 1,000–10,000 in chapters 1 to 9 cover psychic development, singularities, scientology, time travel, explorations in space and time, and communications; years 10,000 to 100,000 in chapters 10 to 19 cover technology developments, explorations, communications, psychic powers, singularities, teleportation, fields of science (astronomy, biology, chemistry, geology, and physics); and years 100,000 to 1,000,000 in chapters 20 to 30 covers singularities, levels of consciousness, technology, exploration, space colonies, higher planes of existence, and a channeled overview.

Brotherhood of the Cross and Star Handbook - Olumba Olumba Obu 2007

Epistemologies of the South -

Boaventura de Sousa Santos 2015-11-17

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism. *Сознание за пределами жизни. Наука о жизни после смерти* - Пим Ломмель 2021-06-12

Что думает современная наука о жизни после смерти? Автор этой книги – всемирно известный голландский кардиолог, исследователь опыта клинической смерти. Как практикующий врач, раз за разом вытаскивавший пациентов «с той стороны», он своими глазами видел невероятные случаи

возвращения к жизни и из первых уст слышал невыдуманные рассказы своих пациентов о том, что они ощутили в момент клинической смерти. В этой книге собраны реальные медицинские истории, научные объяснения паранормальных фактов, а также случаи, которые наука пока объяснить не в силах. В формате PDF А4 сохранен издательский макет.

Women Philosophers in the Long

Nineteenth Century - Dalia Nassar 2021

This volume makes available to English-language readers--in many cases for the first time--the works of nine women philosophers from the German tradition. It showcases their contemporary relevance and their crucial contributions to nineteenth-century philosophical movements. An Editors' Introduction offers a comprehensive overview of the contributions of women philosophers in the Nineteenth Century. Each chapter is furnished with an introduction to the distinctive life and work of the philosopher in questions. The translated texts are accessible and engaging. The translations are furnished with explanatory footnotes. This is a good fit for courses in 19th Century Philosophy which can sometimes be called 19th Century German (or European) Philosophy, as it's very German-heavy. That is a course that is a vast majority of philosophy departments and required for majors. The purpose of the book is to give people texts to use and assign to diversify syllabi in this area since usually it's just about Nietzsche, Schopenhauer, and the like, and no women. For surveys of the History of Philosophy in general, this could also be a core text for people looking to diversify (in terms of gender) their offerings, since 19th Century (German) philosophy is usually such a major part of those courses given the importance of the work that was done then--again this book allows people to diversify their syllabus

Reincarnation in a Nutshell - Maria McMahon 2018-12-27

Would it not be wonderful if we did not only

live one life? Would it not be great to know that death was an illusion and that we lived on after our physical body had stopped functioning? If we could know that death was not the end of life, would that not make us much less worried or afraid, make us much more confident and happier? If we could simply with one stroke eliminate all fear of death, would that not give our lives a whole new meaning and perspective? This is what this book offers the reader. Reincarnation in a Nutshell explains why reincarnation is much more than a belief. With mathematical precision the authors explain why reincarnation simply has to be factual and they present the reasoning, the logic and the evidence for this claim. They also explain how reincarnation takes place and what the master plan of life is. This book is your exit key from the one-life theory and with this new insight you will never doubt your own immortality. Your outlook on life will forever change when you realize that death is an illusion and that your consciousness cannot be extinguished. The insight presented in this book originates from the spiritual science of Martinus, the Danish visionary and mystic. When he was 30, Martinus experienced an expansion of his consciousness which gave him cosmic consciousness. His work is the most profound spiritual revelation ever to have been disclosed to humankind.

Drawing Futures - Bob Sheil 2016-11-11

Drawing Futures brings together international designers and artists for

speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Conspiracy of Life - Jason M. Wirth 2012-02-01

Puts Schelling in conversation with twentieth-century continental philosophy.
