*Postoperative Care in Thoracic Surgery* - Mert Şentürk 2017-03-10

This book offers a comprehensive, up-to-date overview of optimal postoperative care in patients who have undergone thoracic surgery and discusses challenging issues that are of interest not only in the context of thoracic surgery but also more generally within the fields of anesthesia, intensive care, and pain medicine. The coverage ranges, for example, from use of non-invasive ventilation, extracorporeal membrane oxygenation, and new monitoring devices to fluid management, pain control, and treatment of arrhythmias. A key feature of the book is the exceptionally attractive list of authors, who represent the most authoritative experts on the topics that they address. The approach is appropriately multidisciplinary, acknowledging that in many centers thoracic anesthesiologists are responsible for care during the postoperative period. This book is exceptional in being devoted solely to postoperative care in thoracic surgery, even though the difficulties involved in thoracic operations sometimes exceed those of cardiac surgery, especially in the postoperative period.

*Computer Fundamentals & Programming in C* - Reema Thareja  
2012-04-24

Computer Fundamentals and Programming in C is designed to serve as a textbook for the undergraduate students of engineering, computer science, computer applications, and information technology. The book

seeks to provide a thorough overview of all the fundamental concepts related to computer science and programming. It lays down the foundation for all the advanced courses that a student is expected to learn in the following semesters.

*The Art Forger's Handbook* - Eric Hebborn 1997

The English artist Eric Hebborn (1934-1996) explains the secrets of his forging techniques in this illustrated work compiled shortly before his death. Drawings previously attributed to artists such as Picasso and Corot were in fact the work of Hebborn and this work provides an insight through explanations of his work. Inks, papers, pigments, monograms and signatures are all explained as well as Hebborn's own often outrageous speculations about the nature of art and value.

**Psychopathology** - Graham C. Davey 2014-08-08

Psychopathology has been designed to provide students with a comprehensive coverage of both psychopathology and clinical practice, including extensive treatment techniques for a range of mental health issues. The text is designed to be accessible to students at a range of different learning levels, from first year undergraduates to post-graduate researchers and those undergoing clinical training. Psychopathology is primarily evidence and research based, with coverage of relevant research from as recently as 2013, making it useful to researchers as well as clinicians. The emphasis in the book is on providing students with a real insight into the nature and experience of mental health problems, both through the written coverage and by providing a range of video material covering personal accounts of mental health problems. The text is integrated with a wide variety of teaching and learning features that will enable facilitators to teach more effectively, and students to learn more comprehensively. Many of these features have been updated for the new edition and new material has been included to reflect the changes in DSM-5. Features include Focus Points that discuss contentious or topical issues in detail, Research Methods boxes showing how clinical psychologists do research on psychopathology, and Case Histories detailing a range of mental health problems. Online resources An all new student website is available at [www.wiley-psychopathology.com](http://www.wiley-psychopathology.com). The website houses a huge variety of new digital material including more than 50 instructional and supplementary videos covering descriptions of symptoms and aetiologies, examples of diagnosis and diagnostic interviews, recounted personal experiences of people with mental health problems, and discussions and examples of treatment. The site also contains hundreds of new student quizzes, as well as revision flashcards,

student learning activities, discussion topics, lists of relevant journal articles (many of which provide free links to relevant articles published in Wiley Blackwell journals), and topics for discussion related to clinical research and clinical practice. A fully updated lecturer test bank has also been developed including over 1,000 questions, as well as suggested essay questions and these can be accessed by instructors on our lecturer book companion site.

*Paradise* - Craig Alanson 2017-10-30

While the crew of the starship Flying Dutchman have been trying to assure that hostile aliens do not have access to Earth, the UN Expeditionary Force has been stranded on the planet they nicknamed 'Paradise'. The Flying Dutchman is headed back out on another mission, and the UN wants the ship to find out the status of the humans on Paradise. But Colonel Joe Bishop warns that they might not like what they find, and they can't do anything about it without endangering Earth.

*Gorilla in the Room and Other Stories* - Ed Tracy 2021-02-23

Ed Tracy was the perfect candidate for cancer. Intensely motivated and a tireless innovator, the non-stop pace led to high anxiety, erratic sleep patterns and a life-altering medical diagnosis unlike that of anybody else. Rule No.1: Nobody's cancer journey is the same. Growing impatient and irritable, he began to imagine an oncology ward on a Broadway stage with costumes and music and patients and hope. When he needed to check out of chemotherapy, he checked into imaginary rehearsals of a musical comedy. Along the way, he realized the treatments made his memories sharp. He began to periodically track his cancer journey and encouraged friends to get cancer screenings. Soon he was delving into his past-growing up in farm country, acting in college theatre and remembrances of inspirational friends and mentors. Each scene found its place in an act of the musical, and the result is "Gorilla in the Room and Other Stories." These wide-ranging, homespun stories, mixed with family drama and the humor of a skilled storyteller, will appeal to lovers of nature, theater fans, and military enthusiasts and honors the courageous patients, family members and service providers facing life-threatening challenges, aging and a future where they are themselves becoming mentors for the next

generation.

Joyful Mending - Noriko Misumi 2020-03-17

Joyful Mending shows you how to fix old items of clothing, linens and household objects by turning tears and flaws into beautiful features. Simply by applying a few easy sewing, darning, felting, or crocheting techniques, as well as some sashiko and other favorite embroidery stitches, you can repair your favorite pieces in a transformative way. These techniques don't just save you money, but make your life more joyful, fulfilling and sustainable in an age of disposable "fast fashion."

Author Noriko Misumi teaches you her philosophy of mending and reusing items based on the age-old Japanese concepts of mindfulness and Wabi Sabi (an appreciation of old and imperfect things). In her book, she shows you how to: Repair any kind of fabric that is torn, ripped or stained—whether knitted or woven Work with damaged flat or curved surfaces to make them aesthetically pleasing again Create repairs that blend in, as well as bold or whimsical visible repairs Darn your handmade or expensive gloves, sweaters and socks to make them look great again The joy to be found in working with your hands and the personal artistry you discover within yourself lie at the heart of this book. While nothing lasts forever, there's pleasure, as well as purpose, in appreciating age and imperfection. Joyful Mending allows you to surround yourself with the things that truly give you joy, whether they were given to you by a loved one, picked up in your travels or simply have a special place in your heart. *Science Focus* - Rochelle Manners 2010

*Medical Anthropology* - Andrea S. Wiley 2009

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing

anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
