Women's Studies on Its Own - Robyn Wiegman 2002-11-13

"We thought the study of women would be a temporary phase; eventually we would all go back to our disciplines."—Gloria Bowles, From the Afterword Since the 1970s, Women's Studies has grown from a volunteerist political project to a full-scale academic enterprise. *Women's Studies on Its Own* assesses the present and future of the field, demonstrating how institutionalization has extended a vital, ongoing intellectual project for a new generation of scholars and students. *Women's Studies on Its Own* considers the history, pedagogy, and curricula of Women's Studies programs, as well as the field's relation to the managed university. Both theoretically and institutionally grounded, the essays examine the pedagogical implications of various divisions of knowledge—racial, sexual, disciplinary, geopolitical, and economic. They look at the institutional practices that challenge and enable Women's Studies—including interdisciplinarity, governance, administration, faculty review, professionalism, corporatism, fiscal autonomy, and fiscal constraint. Whether thinking about issues of academic labor, the impact of postcolonialism on Women's Studies curricula, or the relation between education and the state, the contributors bring insight and wit to their theoretical deliberations on the shape of a transforming field. Contributors. Dale M. Bauer, Kathleen M. Blee, Gloria Bowles, Denise Cuthbert, Maryanne Dever, Anne Donadey, Laura Donaldson, Diane Elam, Susan Stanford Friedman, Judith Kegan Gardiner, Inderpal Grewal, Sneha Gunew, Miranda Joseph, Caren Kaplan, Rachel Lee, Devoney Looser, Jeanette McVicker, Minoo Moallem, Nancy A.

Life Sciences, Grade 10 - Annemarie Gebhardt 2012-01-05

Study & Master Life Sciences Grade 10 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in Life Sciences. The comprehensive

Learner's Book includes: * an expanded contents page indicating the CAPS coverage required for each strand * a mind map at the beginning of each module that gives an overview of the contents of that module * activities throughout that help develop learners' science knowledge and skills as well as Formal Assessment tasks to test their learning * a review at the end of each unit that provides for consolidation of learning * case studies that link science to real-life situations and present balanced views on sensitive issues. * 'information' boxes providing interesting additional information and 'Note' boxes that bring important information to the learner's attention

Study and Master Life Sciences Grade 11 CAPS Study Guide - Gonasagaren S. Pillay 2014-08-21

Tactical Sciences for Biosecurity in Animal and Plant Systems - Cardwell, Kitty F. 2022-01-21

Agriculture is often under the threat of invasive species of animal pests and pathogens that do harm to crops. It is essential to have the best methods and tools available to prevent this harm. Biosecurity is a mixture of institutions, policies, and science applications that attempts to prevent the spread of unhealthy pests. Tactical Sciences for Biosecurity in Animal and Plant Systems focuses on the tactical sciences needed to succeed in the biosecurity objectives of preventing plant and animal pathogens from entering or leaving the United States. This book explores a divergence of tactics between plant and animal exotic disease response. Covering topics such as animal pests and pathogens, tactical management, and early detection, this book is an essential resource for researchers,

academicians, university faculty, government biosecurity practitioners, customs officers, clinical scientists, and students.

Science in Your World: Teacher edition - Jay K. Hackett 1991

Higher Education in the UK. - 1995

Scientific and Technical Aerospace Reports - 1995

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

The Art of Teaching Science - Jack Hassard 2013-07-04

The Art of Teaching Science emphasizes a humanistic, experiential, and constructivist approach to teaching and learning, and integrates a wide variety of pedagogical tools. Becoming a science teacher is a creative process, and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, mentors, and instructors, and through hands-on, minds-on activities designed to foster a collaborative, thoughtful learning environment. This second edition retains key features such as inquiry-based activities and case

studies throughout, while simultaneously adding new material on the impact of standardized testing on inquiry-based science, and explicit links to science teaching standards.

Also included are expanded resources like a comprehensive website, a streamlined format and updated content, making the experiential tools in the book even more useful for both pre- and in-service science teachers. Special Features: Each chapter is organized into two sections: one that focuses on content and theme; and one that contains a variety of strategies for extending chapter concepts outside the classroom. Case studies open each chapter to highlight real-world scenarios and to connect theory to teaching practice. Contains 33 Inquiry Activities that provide opportunities to explore the dimensions of science teaching and increase professional expertise. Problems and Extensions, On the Web Resources and Readings guide students to further critical investigation of important concepts and topics. An extensive companion website includes even more student and instructor resources, such as interviews with practicing science teachers, articles from the literature, chapter PowerPoint slides, syllabus helpers, additional case studies, activities, and more.
