Future of Work, Work-Family Satisfaction, and Employee Well-Being in the Fourth Industrial Revolution -

Abe, Ethel Ndidiamaka 2020-11-13

Disruptions are being caused in the workplace due to the development of advanced software technology and the speed at which these technological advancements are being produced. These disruptions could take diverse forms and affect various aspects of work and the lives of entities in the workplaces and families of the individual employees. Work and family are caught in the crossfire between technological disruptions and human adaptation. Hence, there is a need to assess the overall effect that the Fourth Industrial Revolution would have on work, employee work-family satisfaction, and employee well-being. *Future of Work, Work-Family Satisfaction, and Employee Well-Being*

in the Fourth Industrial Revolution is a critical reference source that discusses practical solutions and strategies to manage challenges and address fears regarding the effect of the Fourth Industrial Revolution on the future of employment and the workforce. Featuring research on topics such as corporate governance, job satisfaction, and mental health, this book is ideally designed for human resource professionals, business managers, industry professionals, government officials, policymakers, corporate strategists, consultants, work-life balance experts, human resources software developers, business policy experts, academicians, researchers, and students.

The Dynamics of Changing Higher Education in the Global South - Busani Mpfu 2020-06-29

Today, there are generally universities in Africa rather than 'African universities'. The legitimacy of the university in Africa is under serious questions now because of its complicity in racism, patriarchy, sexism, colonialism, capitalism, genocide, epistemicide, linguicide, culturecide, and alienation. In other words, the university in Africa as we know it today is elitist and exclusionary. Therefore, rethinking the idea of the university is fundamental to overcoming its current deficiencies in the Global South. This volume, bringing together a number of national case studies and macro-analyses on the dynamics of changing higher education in the Global South, gestures towards the desired, imagined decolonial African university, which should be a site of multilingualism where African indigenous languages, cosmologies and

ontologies become a central part of its identity and soul, intolerant of epistemicides, linguicides, and cultural imperialism, but a site of cognitive and social justice that fully embraces the idea that all human beings are born into valid, useful, relevant and legitimate knowledge systems.

Spasticity in Adults - ROYAL COLLEGE OF PHYSICIANS. 2018-09

Principles of Management - Openstax 2022-03-25

Principles of Management is designed to meet the scope and sequence requirements of the introductory course on management. This is a traditional approach to management using the leading, planning, organizing, and controlling approach. Management is a broad business discipline, and the Principles of Management course covers many management areas such as human resource management and strategic management, as well as behavioral areas such as motivation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Real-time Coastal Observing Systems for Marine Ecosystem Dynamics and Harmful Algal Blooms - Babin, Marcel
2008-06-05

The proliferation of harmful phytoplankton in marine ecosystems can cause massive fish kills, contaminate seafood with toxins, impact local and regional economies and dramatically affect ecological balance. Real-time observations are essential for effective short-term operational forecasting, but observation and modelling systems are still being developed. This volume provides guidance for developing real-time and near real-time sensing systems for observing and predicting plankton dynamics, including harmful algal blooms, in coastal waters. The underlying theory is explained and current trends in research and monitoring are discussed. Topics covered include: coastal ecosystems and dynamics of harmful algal blooms; theory and practical applications of in situ and remotely sensed optical detection of microalgal distributions and composition; theory and practical applications of in situ biological and chemical sensors for targeted species and toxin detection; integrated observing systems and platforms for detection; diagnostic and predictive modelling of ecosystems and harmful algal blooms, including data assimilation techniques; observational needs for the public and government; and future directions for research and operations.

The Trotula - Trotula 2001-04-16
The Trotula was the most influential compendium on women's medicine in medieval Europe. Scholarly debate has long focused on the traditional attribution of the work to the mysterious Trotula, said to have been the first female professor of medicine in eleventh- or twelfth-century Salerno, just south of Naples, then the leading center of medical learning in Europe. Yet as Monica H. Green reveals in her introduction to this first edition of the Latin text since the sixteenth century, and the first English translation of the book ever based upon a medieval form of the text, the Trotula is not a single treatise but an ensemble of three independent works, each by a different author. To varying degrees, these three works reflect the synthesis of indigenous practices of southern Italians with the new theories, practices, and medicinal substances coming out of the Arabic world. Arguing that these texts can be understood only within the intellectual and social context that produced them, Green analyzes them against the background of historical gynecological literature as well as current knowledge about women's lives in twelfth-century southern Italy. She examines the history and composition of the three works and introduces the reader to the medical culture of medieval Salerno from which they emerged. Among her findings is that the second of the three texts, "On the

Treatments for Women," does derive from the work of a Salernitan woman healer named Trota. However, the other two texts—"On the Conditions of Women" and "On Women's Cosmetics"—are probably of male authorship, a fact indicating the complex gender relations surrounding the production and use of knowledge about the female body. Through an exhaustive study of the extant manuscripts of the Trotula, Green presents a critical edition of the so-called standardized Trotula ensemble, a composite form of the texts that was produced in the mid-thirteenth century and circulated widely in learned circles. The facing-page complete English translation makes the work accessible to a broad audience of readers interested in medieval history, women's studies, and premodern systems of medical thought and practice.

Ulcers of the Lower Extremity - Ajay K Khanna 2016-01-14

This book focuses on the clinical evaluation and management of ulcers of the lower limbs. There are numerous causes for ulceration in the lower limbs and each variety requires careful clinical evaluation and management approach. In 29 chapters, written by highly experienced surgeons, the book covers prevalence, types, healing mechanisms, clinical evaluation and microbiology of the ulcers, followed by detailed review of each ulcer variety. Chapters on pyoderma gangrenosum, diabetic foot, grafts and flaps, amputation, pain control strategy and documentation of these cases provide a complete coverage from management stand-point. The book is essential reading not only for general surgeons and vascular surgeons, but also has relevance for orthopedic surgeons, podiatrists, dermatologists and oncologists who manage such cases. Also serves as reference guide for

post-graduate examination.

Principles of General Management - Tersia Botha 2020-01-21

Principles of General Management: a responsible approach for southern Africa, answers the need of a resource to provide students first entering the field of management, that helps them to become responsible managers and leaders, to be change agents, and to act as the human foundation for responsible organisations. The book is currently the first book written by South Africans for the South African and broader African market, integrating the pillars of responsible management in the main managerial functions. This book covers the traditional view of management, encompassing the planning, organising, leading and control functions. The three pillars of responsible management (sustainability, responsibility and ethics) are then integrated into each of these functions with the aim to develop responsible managers, organisations, socio-economic systems and ultimately a sustainable world society. A responsible manager will embrace triple-bottom line optimization, stakeholder value optimization, ethical decision-making and create moral excellence in his or her organisation. Topics, enriched with South African examples, case studies and scenarios, that are covered include: - The evolution of management theory and how traditional theories evolve to responsible management - A responsible approach to the management process - Sustainability, responsibility and ethics - Social entrepreneurship - The management environment - A responsible approach to organisational planning - A responsible approach to organising - Responsible leadership - Workforce motivation - A responsible approach to controlling The book is ideal for

undergraduate studies at higher education institutions, managers in the corporate and public environment, leaders, project managers (especially for CSR related projects) and anyone aspiring to be a responsible manager.

Management Principles - Pieter Johannes Smit 2020

Research Anthology on Facilitating New Educational Practices Through Communities of Learning - Management Association, Information Resources 2020-10-30

With the future of education being disrupted and the onset of day-to-day uncertainties and challenges that have to be solved quickly, teachers are now turning to professional development communities/support communities where they can share and learn about effective practices to

use in the classroom. While transitioning to blended or online learning and keeping up with the technological advances in education, these communities provide an essential backbone for teachers to rely on for support and updated knowledge on what educational practices are being utilized, how they are working, and what solutions have been found for the ever-changing climate of education. Research on the benefits and use of these communities, as well as on the latest educational practices, is essential in teacher development and student learning in the current culture of a rapidly changing educational environment. The Research Anthology on Facilitating New Educational Practices Through Communities of Learning contains hand-selected, previously published research that provides information on the communities of learning that teachers are currently involved in to seek the latest educational practices. The chapters cover the context of these communities, the benefits, and an overview of how this support is a necessary tool in today's practices of teaching and learning. While highlighting topics such as learning communities, teacher development, mentoring, and virtual communities, this book is essential for inservice and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students who are interested in how communities of practice tie into professional development, teacher learning, and the online shift in teaching.

Multiple-choice Questions for Introduction to Business Management - Sharon Rudansky-Kloppers 2013

Principles of Orthopedic Practice for Primary Care Providers - Andrew J.

Schoenfeld 2021-07-28

Primary care providers (physicians, nurse practitioners, physician assistants) make decisions on a daily basis regarding treatment for musculoskeletal problems, including referrals to orthopedic surgeons and other specialists. Despite the large number of patients presenting with musculoskeletal complaints, primary care providers often feel poorly educated about how to assess and manage these conditions. Now in its fully revised second edition, *Principles of Orthopedic Practice for Primary Care Providers* continues to be a go-to resource for clinicians interested in the effective treatment of musculoskeletal disorders. Written by expert orthopedic, physical medicine and pain management specialists at major Harvard teaching hospitals, the second edition of *Principles of Orthopedic Practice for Primary Care Providers* represents a high-yield and succinct resource on the assessment and management of musculoskeletal conditions. Chapters overview specific body parts, typical presentations of disease, options for diagnostic testing, treatment paradigms, and anticipated outcomes of management both in the primary care setting and following specialist consultation. The text offers suggested pathways for working up and treating these problems with an emphasis on when referral to a specialist, or surgical intervention, is needed. While all previous chapters have been fully revised, this edition also includes nine brand new chapters, including chapters on pain management, hip-spine syndrome, adult spinal deformity, sports-related injuries, and cost and quality in musculoskeletal care. *Textbook of Plastic and Reconstructive Surgery* - Deepak K. Kalaskar 2016-08-02
Written by experts from London's

renowned Royal Free Hospital, *Textbook of Plastic and Reconstructive Surgery* offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation. The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, *Textbook of Plastic and Reconstructive Surgery* is essential reading for anyone interested in furthering their knowledge of this exciting field. Passion killers: The art of passion killing in the age of stress and anxiety - Phillip Walden Bowen 2021-09-07
There is growing pressure and stress placed on organisations to fight for customers and service/product placement in an increasingly competitive global marketplace. It

has, therefore, never been more important to get the best out of the workforce. To achieve this, the role of the leader can be a fundamental factor in organisational success or failure. Leaders need to have the requisite skills to reflect the demands placed upon them in the 21st century. There are the “accidental managers” who just drop into the role of leadership and others who may develop skills and knowledge in readiness for a leadership role. There are also those who may have the innate ability to lead. Within the mix are those who are characterised by traits associated with the “dark triad” or who may use “pathocratic influence” on others to conform, reinforcing values (or lack of values) associated with toxic leadership. They create damage and harm. They become “passion killers”. The result can lead to a “pathocracy”. This book discusses the role emotional intelligence plays in helping people deal with stressful and challenging experiences, suggesting different ways to cope. The author reflects on the values that are integral to the success or failure of an organisation. “Passion” is identified as an added value that can differentiate one organisation from another. If passion is harmed, it can affect motivation, creativity, output, performance, and productivity. Therefore, this book provides the reader with examples of “passion killing” while making suggestions as to factors that can be adopted to engage and encourage passion. Conclusions are drawn and recommendations made to support those faced with “passion killers”. This book is aimed at those of all ages and educational backgrounds interested in developing their leadership knowledge and skills. It is also aimed at those interested in learning more about differences in

personality, emotional intelligence, stress, coping, values, and the importance of understanding the impact of “passion killers”.

Brill's Companion to the Reception of Homer from the Hellenistic Age to Late Antiquity - Christina-Panagiota Manolea 2021

"Brill's Companion to the Reception of Homer from the Hellenistic Age to Late Antiquity presents a comprehensive account of the afterlife of the Homeric corpus. Twenty chapters written by a range of experts in the field show how Homeric poems were transmitted, disseminated, adopted, analysed, admired or even criticized across diverse intellectual environments, from the 3rd century BCE to the 6th century CE. The volume explores the impact of Homer on Hellenistic prose and poetry, the Second Sophistic, the Stoics, some Christian writers and the major Neoplatonists, showing how the Greek paideia continued to flourish in new contexts.

Perspectives on Thought Leadership for Africa's Renewal - Kondlo, Kwandiwe 2014-05-05

This book outlines perspectives of emerging and established African scholars on what one could describe as the debate on leadership and the articulation of the life of the mind in Africa's socio-economic, political and cultural life from the time of independence to date. The papers contained in the book cover the following thematic areas: Alternative

Leadership Paradigm for Africa's Advancement; African Perspectives on Globalisation and international relations; Pan-Africanism and the African Renaissance; Scientific, Technological and Cultural Dimensions of African Development. The first section deals with alternative leadership paradigms for Africa's advancement. It also debates the 'thin line' separating management studies from leadership studies and untangles the hermeneutic complexities in the term 'leadership'. Section two examines among other things, the crucial challenge of globalisation and public ethics and others African perspectives. The section also interrogates the current complexities and credibility deficits in the global governance of trade and towards the end engages philosophical questions about conscience and consciousness in African development and progress. The debates in section three continue to section four and focus on the overall issues of language and liberation, the significance of Multi-, Inter and Trans-Disciplinary Approaches in the analysis of the African continent, appropriate indigenous paradigms for promoting the African renaissance as well as a series of debates on the meaning and prospects of regional integration in Africa's renewal. This provides just a snapshot of a very wide ranging and interesting debate contained in the publication.

Revision Surgery of the Foot and Ankle - Mark J. Berkowitz 2019-12-28
This unique text utilizes a bulleted, case-based approach to present a

variety of surgical strategies and techniques for tackling the many challenges posed by revision foot and ankle surgery. The book is organized thematically into sections on the forefoot, trauma, sports injuries, and arthritis and reconstruction, with each chapter including key takeaway points, discussions of evaluation, surgical planning, and the cases themselves. Specific revision topics presented include first MTP joint fusion, failed bunion and hammertoe, failed Lisfranc and fifth metatarsal fracture, failed flatfoot and subtalar fusion, and nonunion of ankle fusion and failed total ankle replacement, among others. The challenge of revision foot and ankle surgery is that there are countless ways for a surgery to fail. Therefore, presenting as many different scenarios as possible and techniques to address them is the main advantage of the book. Practical and user-friendly, *Revision Surgery of the Foot and Ankle* will prove indispensable to both the young and veteran orthopedic surgeon preparing for these challenging surgical interventions.

Business Management - Hannie Badenhorst-Weiss 2008-02

The world is in a constant state of flux, and this influences the operations of every business and organisation. *Business Management: A Contemporary Approach* deals with these changes by covering the functions of a business or an

organisation and then addressing the contemporary issues that affect them. These issues include globalisation, corporate entrepreneurship and citizenship, credit, diversity and HIV/AIDS. Every student of business and business manager needs to understand the importance of these issues and their influence on the operations of a business. Business Management: A Contemporary Approach also highlights the interdependency between the various business functions. This interdependency is very important for a business or organisation to operate as a whole.

Knowledge Management as a competitive edge in a global economy - Maria; Matsilele 2012-07-12

The book focuses on how knowledge is being transformed and managed at companies for competitive advantage and as well as for economic benefits. Companies should take it upon themselves to appoint people who are capable of uplifting their knowledge base and enhancing their organization's intellectual property; they should appoint people who are in a position to learn fast and adjust to internal as well as to external forces of change. Thus, training and development should form part and parcel of a company that is prepared to move ahead of its competitors. Through the right channels of addressing constant changes that are taking place in the market, the company should have a special way of doing business and of possessing special knowledge that will put it ahead of its competitors. The book is written in the academic format but can be well understood by readers who are not experts in the field, as academic jargon is used to the minimal. It is written in simple language which could be understood by readers who have a reasonable mastery of the English language. The book has 58 pages, 16 606 words; it also has 3

figures and 2 tables. The glossary is provided at the end of the chapters to assist the readers who may not be familiar with certain concepts.

The Emergence of a Scientific Culture

- Stephen Gaukroger 2008-10-23

Why did science emerge in the West and how did scientific values come to be regarded as the yardstick for all other forms of knowledge? Stephen Gaukroger shows just how bitterly the cognitive and cultural standing of science was contested in its early development. Rejecting the traditional picture of secularization, he argues that science in the seventeenth century emerged not in opposition to religion but rather was in many respects driven by it. Moreover, science did not present a unified picture of nature but was an unstable field of different, often locally successful but just as often incompatible, programmes. To complicate matters, much depended on attempts to reshape the persona of the natural philosopher, and distinctive new notions of objectivity and impartiality were imported into natural philosophy, changing its character radically by redefining the qualities of its practitioners. The West's sense of itself, its relation to its past, and its sense of its future, have been profoundly altered since the seventeenth century, as cognitive values generally have gradually come to be shaped around scientific ones. Science has not merely brought a new set of such values to the task of understanding the world and our place in it, but rather has completely transformed the task, redefining the goals of enquiry. This distinctive feature of the development of a scientific culture in the West marks it out from other scientifically productive cultures. In *The Emergence of a*

Scientific Culture, Stephen Gaukroger offers a detailed and comprehensive account of the formative stages of this development--and one which challenges the received wisdom that science was seen to be self-evidently the correct path to knowledge and that the benefits of science were immediately obvious to the disinterested observer.

Tourism - Syed Abdul Rehman Khan
2021-10-06

Tourism was booming until 2019 when the COVID-19 pandemic hit. Since then, tourism and related industries have suffered from negative economic impacts. This book examines current challenges and opportunities in the tourism industry using case studies from different parts of the world. It also examines the challenges and obstacles faced by the tourism sector due to lack of environmental policies, high crime rates, and poverty.

Management Principles - P. J. Smit
2007

Book & CD. To improve on an award-winning book poses a major challenge to its authors. The authors of this book took the challenge head-on by conducting a major research study to determine what exactly the outcomes are that managers at different levels must deliver in contemporary organisations in South Africa, and the rest of Africa. The findings of this study, which dealt with current and near-future management issues, as well as classical and contemporary thinking about management, were used as the blueprint for the updating of this book. After placing management in context, the authors deal with the knowledge, skills and dispositions required of managers to perform the management functions of planning, organising, leading and controlling in a volatile business world. Examples of how the functions are applied in practice are cited

throughout the book. These examples refer mainly to South African organisations and situations that managers in South Africa, and Africa, have to deal with to create and sustain a competitive advantage for their organisations. The book endeavours to break down the silo effect of seeing the management functions as separate activities. This is done by continuously placing the management function at hand in a bigger context. This enables learners of management to assess the implications of management decisions on different people, processes, systems and so on that make up the organisation.

Postgraduate Orthopaedics - Paul A.
Banaszkiewicz 2012-08-16

This book has been written specifically for candidates sitting the oral part of the FRCS (Tr & Orth)

examination. It presents a selection of questions arising from common clinical scenarios along with detailed model answers. The emphasis is on current concepts, evidence-based medicine and major exam topics. Edited by the team behind the successful Candidate's Guide to the FRCS (Tr & Orth) Examination, the book is structured according to the four major sections of the examination; adult elective orthopaedics, trauma, children's/hands and upper limb and applied basic science. An introductory section gives general exam guidance and end section covers common diagrams that you may be asked to draw out. Each chapter is written by a recent (successful) examination candidate and the style of each reflects the author's experience and their opinions on the best tactics for first-time success. If you are facing the FRCS (Tr & Orth) you need this book.
