

Mahinda Chinthana Vision For The Future

Thank you very much for downloading **Mahinda Chinthana Vision For The Future**. Maybe you have knowledge that, people have look numerous times for their chosen novels like this Mahinda Chinthana Vision For The Future, but end up in malicious downloads.

Rather than enjoying a good book with a cup of coffee in the afternoon, instead they juggled with some harmful bugs inside their computer.

Mahinda Chinthana Vision For The Future is available in our book collection an online access to it is set as public so you can get it instantly.

Our digital library spans in multiple locations, allowing you to get the most less latency time to download any of our books like this one.

Kindly say, the Mahinda Chinthana Vision For The Future is universally compatible with any devices to read

The World Economy -
David Greenaway
2013-04-22
This is the nineteenth
volume in an annual
series in which leading

economists provide a
concise and accessible
evaluation of major
developments in trade
and trade policy.
Examines key issues

pertinent to the multinational trading system, as well as regional trade arrangements and policy developments at the national level Includes chapters exploring WTO issues, and agricultural trading issues Provides up-to-date assessments of the World Trade Organization's current Trade Policy Reviews Analyses global trade policy in areas such as Australia and Sri Lanka, and includes special sections on both China and Malaysia A vital resource for researchers, analysts and policy-advisors interested in trade policy and other open economy issues

UNESCO science report - UNESCO 2015-11-09

There are fewer grounds today than in the past to deplore a North-South divide in research and innovation. This is one of the key findings of

the UNESCO Science Report: towards 2030. A large number of countries are now incorporating science, technology and innovation in their national development agenda, in order to make their economies less reliant on raw materials and more rooted in knowledge. Most research and development (R&D) is taking place in high-income countries, but innovation of some kind is now occurring across the full spectrum of income levels according to the first survey of manufacturing companies in 65 countries conducted by the UNESCO Institute for Statistics and summarized in this report. For many lower-income countries, sustainable development has become an integral part of their national development plans for the next 10–20 years. Among higher-income

countries, a firm commitment to sustainable development is often coupled with the desire to maintain competitiveness in global markets that are increasingly leaning towards 'green' technologies. The quest for clean energy and greater energy efficiency now figures among the research priorities of numerous countries. Written by more than 50 experts who are each covering the country or region from which they hail, the UNESCO Science Report: towards 2030 provides more country-level information than ever before. The trends and developments in science, technology and innovation policy and governance between 2009 and mid-2015 described here provide essential baseline information on the concerns and priorities of countries

that could orient the implementation and drive the assessment of the 2030 Agenda for Sustainable Development in the years to come. In His Own Words - Mahinda Rājapakṣa 2014

International Education Aid in Developing Asia - I-Hsuan Cheng 2015-05-22
This book provides an Asian perspective on the timely, urgent questions of how international education aid and development should move forward and what development roles Asia should play, especially following the end of the UN Millennium Development Goals (MDGs) and Education for All (EFA) in 2015. To answer these questions, four separate but interwoven parts, which analyze and anchor education MDGs and EFA policies and practices by means of diverse case studies of donor states, recipient

states, and states with a dual and transitional role in Asia, are addressed. On the basis of the analyses, a clearer and concrete direction for effectively and sustainably extending international education aid and development beyond 2015 can be derived.

Sustainable Tourism in the Global South -

Mohamed Aslam 2016-04-26

A burning global issue, the achievement of sustainable tourism, can never ignore the global south or developing regions of the planet where tourism is rapidly growing. The readership of this book will be taken through a fascinating and comprehensive collection of writings on sustainable tourism, which brings together a compilation of profound conceptual and empirical research findings from

diverse socio-economic and environmental settings in the developing South. The contributions of expert and new researchers review and interpret ideals and multiple realities concerning the concept of sustainability in the tourism development process. The categorization of the book into three parts – community, environment and management experience – encompasses the different flavours of sustainability in tourism, catering to the tastes of readers with different perspectives. Detailed accounts of the community component of sustainable tourism bring forth fascinating insights relating to its many facets, such as community capacity and participation, community empowerment, community integration, and community perceptions of

and women's right to run for political office. This dual focus makes this the first book to combine historical overviews of debates about enfranchising women alongside analyses of more contemporary efforts to increase women's political representation around the globe. Chapter authors map and assess the impact of these groundbreaking reforms, providing insight into these dynamics in a wide array of countries where women's suffrage and representation have taken different paths and led to varying degrees of transformation. On the eve of many countries celebrating a century of women's suffrage, as well as record numbers of women elected and appointed to political office, this timely volume offers an important introduction

to ongoing developments related to women's political empowerment worldwide. It will be of interest to students and scholars across the fields of gender and politics, women's studies, history and sociology.

Sustainable Tourism

Development - Anukrati Sharma 2019-08-05

Exploring the importance of destination branding and destination marketing as well as their implications on sustainability in tourism, this book approaches the topic through the lens of destination image, taking into account the large influence of appearance on tourist attraction. With consideration to various stakeholders in sustainable tourism development, this book incorporates ideas for new techniques in destination branding and

marketing in order to maximize economic impact. The book also discusses the rising influence of social media on tourists' interest. Emphasizing sustainability in tourism development, the chapters address a number of important issues, such as post-disaster tourism marketing, culture and heritage tourism, eco-tourism, community-based nature tourism, community involvement in destination development, benchmarking for destination performance evaluation, sustainable food practices in tourism, and more. Each chapter of this book incorporates a quantifiable trend in tourism development, including various paradigms and studies that relay different statistics about certain areas of tourism. The book makes use of case

studies for specific destinations and integrates strategies, evidence, and analyses to offer a holistic understanding of the myriad factors involved in sustainable tourism development.

New Horizons in Management, Leadership and Sustainability -

Satinder Dhiman
2021-05-17

Drawing upon research and practitioner narratives from management, leadership, organizational studies, entrepreneurship and sustainable business domains, this book explores the many pathways that enable emerging countries to transform knowledge into action to achieve economic and sustainable development. The authors take a holistic approach to 'transforming knowledge' that goes beyond the mere 'application of

knowledge' to include the assimilation, adaptation, and contextualization of knowledge to suit the unique contexts, needs and conditions existing in emerging countries. They then presents success stories and case studies comprising innovative solutions for emerging economies that practitioners can utilize. Current research in management is highlighted by bringing together academics, practitioners, policy-makers and interest groups from diverse regions and perspectives.

Globalisation, Employment and Education in Sri Lanka - Angela W. Little 2014-05-23

Since the late 1970s, Sri Lanka has undergone a socio-economic transformation, from protectionism towards economic liberalisation

and increasing integration into the world economy. Through a systematic comparison of these periods of economic change (1956–1977, and 1977 to the present), Angela W. Little and Siri T. Hettige examine the impact of this transformation on education, youth employment and equality of opportunity in Sri Lanka. The book charts Sri Lanka's shift from a predominantly agricultural economy to one dominated by services and manufacturing, a reduction in unemployment, rising educational and occupational levels, expectations and achievements, and a reduction in poverty. In turn, it reveals a growing role for the private sector and foreign interests in post-secondary education

and a modest growth in private education at the primary and secondary levels, as well as widening social disparities in access to qualifications, training and skills. The Sri Lankan experience of, and engagement with, globalisation has been tempered by a long-running ethnic conflict that hindered economic and social development and diverted considerable public funds into defence and war. Now that the war is 'won', the challenge is how to invest in human resource development and the fulfilment of the expectations of youth from all ethnic and social groups. This challenge requires serious policy analysis, the generation of more state revenues, the reallocation of existing public resources, and a political commitment to the winning of a

sustainable peace and stability. This book makes an important contribution to the broader international literature on the implications of globalisation for education policy and practice, and to the interaction of exogenous and endogenous forces for educational change. It deals with the tension between the high social demand for education and the growing demand for specialised skills in a changing economy. As such, it has a wide interdisciplinary appeal across education policy and politics, Asian education, South Asian society, youth policy, sociology of education, political economy of social change, and globalisation.

**Blue-Green
Infrastructure Across
Asian Countries** -
Shalini Dhyani

2022-03-24

This edited book discusses Blue-Green Infrastructure (BGI) from conception to implementation in building resilience and urban sustainability. The book emphasizes on infrastructures, institutions, and perceptions as three main pillars of implementing and managing successful BGI, with a special focus on Asia. The book highlights concepts as well as field-based experiences from different parts of Asia by experts, with a special focus on advances and opportunities in advancing BGI, challenges and constraints, followed by case studies on BGI mainstreaming. It addresses sustainable water management, multiscale environmental design, environmental

risk assessment, and finally understanding policy implications and concerns for BGI mainstreaming in growing urban sprawls of the region. There has been growing global momentum and recognition of Blue-Green Infrastructure (BGI) as a multifunctional Nature-based Solution (NbS) with multiple co-benefits. There is strong evidence from many urban centres of Europe, USA, China, and South Africa demonstrating that mainstreaming BGI can help in addressing growing vulnerability of urban areas by ensuring safety, resilience, and sustainability for urban residents in the warming world. This book is a timely contribution for researchers, students, scholars, urban planners, consultants, and policy makers in the fields of environment,

resilience, urban planning, climate adaptation, and sustainability science.

Autonomy and Ethnic Conflict in South and South-East Asia - Rajat Ganguly 2013-05-20

This book uses empirical evidence from various case studies to examine the relationship between territorial and regional autonomy, the nation-state and ethnic conflict resolution in South and South-East Asia. The concept of territorial or regional autonomy holds centre stage in the literature on ethnic conflict settlement because it is supposed to be able to reconcile two paradoxical objectives: the preservation of the territorial integrity and sovereignty of the state, and the satisfaction of ethnic minorities' right to national self-determination. Critics

argue, however, that autonomy may not be the panacea for ethnic conflict in all cases. The contributing authors begin with the concept of territorial or regional autonomy and subject it to a rigorous empirical analysis, which provides reliable evidence regarding the suitability of the autonomy solution to intractable ethnic conflicts. Drawing upon case studies from Kashmir, Assam, Sri Lanka, Aceh, Mindanao and Southern Thailand, this edited volume argues that autonomy arrangements may at best work to resolve only a handful of separatist ethnic conflicts in South and South-East Asia. This book will be of much interest to students of South and South-East Asia, Asian security, ethnic conflict, peace studies and IR in general.

Copyright Law and Translation - Chamila S. Talagala 2021-05-06

Arguing that the translation of scientific and technical learning materials, and the publication of these translations in a timely and affordable manner, is crucially important in promoting access to scientific and technical knowledge in the developing world, this book examines the relationship between copyright law, translation and access to knowledge. Taking Sri Lanka as a case study in comparison with India and Bangladesh, it identifies factors that have contributed to the unfavourable relationship between copyright law and the timely and affordable translation of scientific and technical learning materials, such as colonisation, international copyright

law, the trade interests of the developing economies and a lack of expertise and general lack of awareness surrounding copyright law in the developing world. Highlighting the need to reform international copyright law to promote the needs and interests of developing countries such as Sri Lanka, the book points to a possible way forward for developing countries to achieve this and to address the problem of striking a proper and delicate balance in their copyright laws between the protection of translation rights and the ability of people to access translations of copyright protected scientific and technical learning materials. *Regional Cooperation for Sustainable Food Security in South Asia* - Nagesh Kumar 2019-08-02

This volume foregrounds the importance of regional cooperation in the context of food security challenges in South Asia. South Asia holds the key to global achievement of SDG targets of ending hunger and malnutrition – it accounts for nearly one-third of food-insecure people on the planet, with every third child suffering from stunting due to malnutrition. Similar food preferences, production systems, and the transboundary nature of agrarian ecosystems call for coordinated action by South Asian countries, complementing national actions dealing with food security challenges. In this volume, leading experts discuss the perspectives of key South Asian countries in leveraging regional cooperation for addressing food security challenges and reflect

on the potential of cooperative actions in different areas. The book proposes a ten-point regional policy agenda covering cooperation for combatting climate change, regional trade liberalization, operationalization of regional food reserves, leveraging technology, sharing of good practices, regional institution building, coordinated positions in multilateral trade negotiations, addressing trans-boundary outbreak of livestock diseases, strengthening food safety standards, and the management of shared natural resources. A key volume on accomplishing SDGs in the South Asian context, this book will be of immense interest to policy makers, researchers, and development practitioners. It is also essential reading

for scholars and researchers in the areas of development studies, South Asia studies, food security, environment and sustainability.

Urban Utopias - Tereza Kuldova 2017-03-09

This book brings anthropologists and critical theorists together in order to investigate utopian visions of the future in the neoliberal cities of India and Sri Lanka. Arguing for the priority of materiality in any analysis of contemporary ideology, the authors explore urban construction projects, special economic zones, fashion ramps, films, archaeological excavations, and various queer spaces. In the process, they reveal how diverse co-existing utopian visions are entangled with local politics and global capital, and show how these utopian visions

are at once driven by visions of excess and by increasing expulsions. It's a dystopia already in the making – one marred by land grabs and forced evictions, rising inequality, and the loss of urbanity and civility.

Maritime Sri Lanka: Historical And Contemporary

Perspectives - Chulanee Attanayake 2021-01-18
Being an island nation, the ocean is never too far from Sri Lanka. Situated right at the center of the world's busiest sea lanes of communication, the geography connects the country with the Indian Ocean, and its destiny is linked to this strategic body of water. For centuries, the Indian Ocean has been part of Sri Lanka's strategic, security, and political narratives. However, over the years, the country's

involvement in the affairs of the Indian Ocean has retracted due to domestic and regional circumstances. Its consciousness of its ocean identity declined when it took an inward orientation which gave greater visibility to its South Asian identity, and its own imagination began to pivot towards the Indian hinterland. However, with the rising importance of the Indian Ocean in geopolitics, and with the end of the civil war, Sri Lanka's consciousness of its ocean identity has grown. Successive governments have formulated policies that would have paved its way to become the hub of the Indian Ocean, making the ocean the center of its economic development, maritime security, and defense relations. Amidst this backdrop, this book explores

historical and contemporary perspectives on Sri Lanka's relations with the Indian Ocean.

The Emperor's New Road -
Jonathan E. Hillman
2020-09-29

A prominent authority on China's Belt and Road Initiative reveals the global risks lurking within Beijing's project of the century China's Belt and Road Initiative is the world's most ambitious and misunderstood geoeconomic vision. To carry out President Xi Jinping's flagship foreign-policy effort, China promises to spend over one trillion dollars for new ports, railways, fiber-optic cables, power plants, and other connections. The plan touches more than one hundred and thirty countries and has expanded into the Arctic, cyberspace, and even outer space.

Beijing says that it is promoting global development, but Washington warns that it is charting a path to global dominance. Taking readers on a journey to China's projects in Asia, Europe, and Africa, Jonathan E. Hillman reveals how this grand vision is unfolding. As China pushes beyond its borders and deep into dangerous territory, it is repeating the mistakes of the great powers that came before it, Hillman argues. If China succeeds, it will remake the world and place itself at the center of everything. But Xi may be overreaching: all roads do not yet lead to Beijing.

Postcolonial Nations, Islands, and Tourism - Helen Kapstein
2017-07-11

Considers how real island spaces have been

used in literary texts and the popular imagination to shore up the fiction of the nation in order to offer a new theory of postcolonial nationalism.

Innovative Strategies in Technical and Vocational Education and Training for Accelerated Human Resource Development in South Asia: Sri Lanka - Asian Development Bank
2015-11-01

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for

innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia). Historical Dictionary of Sri Lanka - Patrick Peebles 2015-10-22 The Historical Dictionary of Sri Lanka contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 700 cross-

referenced entries on important personalities, politics, economy, foreign relations, religion, and culture. This book is an excellent access point for students, researchers, and anyone wanting to know more about Sri Lanka.

Power, Justice and Citizenship: The

Relationships of Power - Darian McBain 2019-01-04

Who holds the power when considering environmental justice and global citizenship? The roles of individuals, governments, media, educators and policy makers are considered to provide a thought-provoking look at power relationships for environmental justice in the start of the 21st century.

Investing in Infrastructure - Dan Biller 2013-07-18
Sri Lanka achieved

middle-income-country status in January 2010, on the strength of the economic growth fueled by the liberalization policy introduced in the late 1970s and pursued albeit unevenly in the following years. To continue growing, however, Sri Lanka needs to pay attention to its much neglected infrastructure. Accordingly, this report, aims to provide policy makers in Sri Lanka with a sound analytical basis for prioritizing investments and designing policy interventions that result in the mobilization of funds and their effective use for future development of Sri Lanka's infrastructure, and also to improve understanding of the infrastructure sectors in Sri Lanka, including their current state and performance,

future development needs, investment requirements and financing gaps, and bottlenecks to infrastructure development. The report assesses the country's infrastructure endowment and performance, analyzes the contribution of infrastructure to economic and spatial development, and outlines investment needs and strategic priorities within those established by the Mahinda Chintana. It provides a cross-sectoral analysis of the major infrastructure cross-cutting themes including the link between infrastructure and poverty reduction and economic growth; the institutional and regulatory framework; the main issues regarding planning, coordination, and financing; and the role

and constraints of private sector participation in infrastructure financing and service provision. It identifies bottlenecks to economic growth and considers policy issues to address them.

Global Debt Dynamics -

Andreas Antoniadis
2020-05-21

This comprehensive volume explores debt dynamics and the intensification of debt crises across the globe, bringing together several recent but underexplored debt crises from different regional and socioeconomic contexts. Using detailed case studies, the authors recast the perils of debt-based growth in the context of regional/global imbalances; not to advocate 'one-size-fits-all' reforms, but to point to the need for

accommodating diversity. They examine how current economic developments put developing and developed countries under new strain. They also interrogate the opportunities and challenges generated for developing countries by the new development finance landscape and newly (re)emerged geopolitical tensions. The book also explores the inability of existing dominant structures and thinking to effectively manage the multiple facets of the ongoing global debt crisis, pointing to responses that exacerbate rather than address unsustainable debt dynamics. The authors illustrate the adverse effects of ad hoc crisis management mechanisms which are not fit for purpose, and indicate the negative consequences that existing policies may

have for democracy. They then put forward a framework for alternative thinking as well as concrete ideas on what needs to be done, in response. This book will be of great interest to students, scholars and professionals in the field of global debt studies. It was originally published as a special issue of the online journal Third World Thematics.

Feminist Subversion and Complicity - Maitrayee Mukhopadhyay 2017-03-06

Feminist Subversion and Complicity interrogates a specific form of feminist practice, that which has involved engaging with state and international institutions to insert gender knowledge in their development interventions. Bringing together contributions from eight feminists located in very

different kinds of institutions and spaces from Bangladesh, Nepal, Pakistan, Sri Lanka and India, this book is the outcome of a deeply reflexive process to produce a critique from within of this present day feminist practice. An array of experiences and encounters are scrutinised - from bringing feminist perspectives to governmental projects on education, health, and legal reform to transformations in the discourses and practices of women's movements and feminisms as they encountered developmentalisms. The writers show that feminist politics is not merely assimilated in governmental projects but that it interrupts these projects even as it is assimilated; a feminist politics in which complicity is often a subversive

problems associated with lost economic opportunities and population decline that accompany the waning of agriculture. Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions, stimulating growth, providing employment opportunities and thus beginning to halt rural decline. However, the possibilities of rural tourism to promote rural regeneration have been criticised for being over-stated and unrealistic. Rural tourism has frequently been found to under-deliver in terms of expected economic benefits and job creation, and may sometimes exacerbate local hierarchies and inequalities. This edited collection questions the

Rural Tourism -
Katherine Dashper
2015-01-12

Rural regions are experiencing fundamental challenges to their ways of life and social fabric, as traditional land-based occupations are in decline and younger and better-educated rural residents migrate to cities for greater work, social and cultural opportunities. Rural tourism offers a possible solution to the

problems associated with lost economic opportunities and population decline that accompany the waning of agriculture. Many governments and regional authorities have embraced rural tourism as an opportunity to bring new money into rural regions, stimulating growth, providing employment opportunities and thus beginning to halt rural decline. However, the possibilities of rural tourism to promote rural regeneration have been criticised for being over-stated and unrealistic. Rural tourism has frequently been found to under-deliver in terms of expected economic benefits and job creation, and may sometimes exacerbate local hierarchies and inequalities. This edited collection questions the

contribution tourism can and does make to rural regions. Drawing on a range of geographically diverse, research-driven case studies, the book is thematically organised to explore a variety of issues relevant to rural tourism, from the perspectives of local communities, businesses, government/policy makers and the tourists themselves.

Building the Skills for Economic Growth and Competitiveness in Sri Lanka - Halil Dunder

2014-05-29

This book examines skills demand and supply in Sri Lanka, and offers insightful analysis of the education and training system, and its responsiveness to changes in demand for skills. The book also provides suggestions on how the skills development system can be improved to better

achieve Sri Lanka's development goals.

A New Paradigm for International Business - Hadrian Geri

Djajadikerta 2015-07-01

This book offers a collection of studies on regional integration and the dynamic business environment in East Asia. The papers included, originally presented at the 2014 Asia Pacific Business Conference on "Free Trade Agreements and Regional Integration in East Asia," examine the challenges and dynamics in the increasingly integrated East Asian markets and outline a new paradigm for doing international business in the region. The papers address diverse areas related to regional integration, financial markets, investment, trade and capital flow, sustainability, accounting and auditing

issues, exchange rates, strategies and the regional business environment. The book provides a valuable resource for practitioners, policy-makers and students who are interested in understanding the vibrant aspects of business in today's East Asia.

An Uneasy Hegemony -

Shyamika Jayasundara-

Smits 2022-08-31

Sri Lanka has been regarded as a model democracy among former British colonies. It was lauded for its impressive achievement in terms of human development indicators. However, Sri Lanka's modern history can also be read as a tragic story of inter-ethnic inequalities and tensions, resulting in years of violent conflicts. Two long spells of anti-state youth uprisings were

followed by nearly three decades of civil war, and most recently a renewed upsurge of events are examples of the on-going uneasy project of state-building. This book discusses that state-building in Sri Lanka is centred on the struggle for hegemony amidst a kind of politics that rejects individual and group equality, opposes the social integration of marginalised groups and appeals to narrow, fearful and xenophobic tendencies among the majority population and minorities alike. It answers the pressing questions of - How do the dynamics of intra-Sinhalese class relations and Sinhalese politics influence the trajectories of post-colonial state-building? What tensions emerge over time, between Sinhalese hegemony-building and wider

state-building? How did these tensions manifest in majority and minority relationships?

Improving Policy

Coherence in South Asia

- Manas Bhattacharyya
2010

Collection of papers, originally presented at the "High-level tripartite meeting on the nexus of growth, investment and decent work for the South Asian Region", held in New Delhi, 4 April 2007. Evaluates coherence among policies designed to promote growth, investment and decent work at the national level in seven South-East Asian countries.

Crossing the Himalayas

- Nian Peng 2021-10-27

This book aims to analyze two contrasting trends of integration and rivalry among great powers and regional states of Himalaya. It examines the interactions between the

great powers and the small states in the Himalayan region, analyzes the multiple effects of the great power rivalry on the regional cooperation, and predicts the possible directions of the future of the geopolitics and geo-economy in the Himalayan region by incorporating the most recent developments. The main content of the book is divided into 11 parts. The Introduction briefly explains the aims and scope of this book. The following chapter focuses on the Buddhist ties between China and the Himalayan states in the past two millennia and its dual influence in the Himalayan region. The rest 9 chapters provide an in-depth analyses of the security dilemma between China and India, Indian perspectives on China-South Asian relations,

Chinese perspectives on U.S. and Japan's engagement with South Asia and Indo-Myanmar relations, and Pakistan, Sri Lanka, Bangladesh and Nepal's responses to the regional integration and great power rivalry in the Himalayan region respectively. This is the first study which brings the Himalaya region at the center of geopolitical and geo-economics cooperation and rivalry thus highlighting its significance in Asian politics. It offers a comprehensive analysis of the complicated geopolitical and geo-economic competition in the Himalayan region by inviting experts from both South Asia and China to contribute chapters. It also balances the west-centered views on the great power rivalry by introducing cultural perspective and small

state perspective. The broad approach adopted in the book with focus on all important countries expands the scope of readership beyond specific academic community. The book will interest academics, policy makers, journalists, general reader and students of Asian politics.

Smart, Sustainable And Inclusive Cities: Changing Urban Dynamics
- Dr. Bushra Beegom RK

Balancing Development and Sustainability in Tourism Destinations - Akhmad Saufi 2016-09-26
This book contains 35 papers from the Tourism Outlook Conference held in Lombok, Indonesia in July 2015. The book presents comprehensive discussions on sustainability in the tourism industry. It includes research on various constituents of the tourism sector and

analyses of each of them from a sustainability standpoint. Case studies that are global in nature are presented to show how sustainable applications can be used and how concerns can be addressed. The book is a response to rapid change in contemporary tourism trends brought about by global economic and social forces such as development pressures, population growth, major resource extraction, industrial fishing, global climate change and steadily rising sea levels. Balancing Development and Sustainability in Tourism Destinations serves as a platform for students and educators, government agency employees, hospitality and tourism industry practitioners, public and private land managers, community development workers, and others interested in

identifying practical solutions, charting new directions, and creating opportunities for sustainable tourism development.

The World Guide to Sustainable Enterprise -

Wayne Visser 2017-09-08

The World Guide to Sustainable Enterprise is the first comprehensive global compendium that clearly describes the national approaches to sustainable enterprise. Through a systematic review of each country, this quick-to-access reference guide showcases the similarities and differences in each region. Every country profile includes key information about the relevant history, country-specific issues, trends, research, and the leading organizations operating in the field as well as best-practice case

studies. The guide comprises four volumes, each dedicated to a specific region of the world. In a world where organizations are working increasingly across national and regional boundaries and research takes a joined-up and international approach, this book is an essential guide for practitioners and researchers in the disciplines of business sustainability, social enterprise and corporate responsibility. The first of its kind, this reference book provides the reader with a unique insight into what is the current state-of-play in each country. Each edited volume provides expert contributions from around the world; the contributors have been selected on the basis of their knowledge of the country and their clear experience in sustainable enterprise.

Each regional/country profile includes the following subsections: Sustainable Enterprise in context; Priority issues; Trends; Government policies; Case studies; Further resources; and References. This unique resource will be an essential acquisition for all organizations who need to benchmark their sustainable enterprise strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to sustainable business and social responsibility in all of the markets in which they operate. It provides a useful companion reference collection to the World Guide to CSR, also edited by Wayne Visser. The full Four Volume Set of The World Guide to Sustainable Enterprise

is available for purchase as a single item at a 25% discounted rate.

Electoral Politics in Sri Lanka - S. I.

Keethaponcalan

2022-07-21

This volume examines and analyses electoral politics in Sri Lanka through the theoretical framework of manipulation. The following questions guided the study: how do political actors manipulate elections, and what are the salient features of electoral politics in Sri Lanka? Primary and secondary data formed the basis of the analysis, examining eight presidential elections. The research findings indicated that Sri Lankan governments, political parties and political leaders have taken advantage of six types of electoral manipulation, including constitutional

tinkering, field fixing, time fixing, vote suppression, process manipulation and resource manipulation. Through a close examination of eight presidential elections, research carried out for the volume found that elections are often associated with violence; presidential elections are mainly a majoritarian affair in which minority communities play only a marginal role; there is a significant gender imbalance, as women's participation in the electoral process is very limited; despite the presence of a large number of candidates contesting the election, it always remains a two-way race; and amid extensive manipulation and other problems, voter participation tends to be high. This volume will be a valuable resource for

students, academics and researchers who focus on democracy, good governance, electoral studies and South Asian politics and history, and will enhance the conceptual foundation of democracy advocates and activists.

Integrating Intellectual Property into Innovation Policy Formulation in Sri Lanka - World Intellectual Property Organization 2015-05-28

This report presents a review of Sri Lanka's national innovation system, including in-depth stakeholder interviews regarding the extent to which intellectual property (IP) has been integrated therein. It also provides focused recommendations, adapted to the specific national context, for improving reliance on the IP system.
