A Woman to Deliver Her People - James K. Hopkins 1982-03

The Second Coming of Christ has been prophesied

many times through the centuries but seldom by a figure so fascinating as Joanna Southcott (1750-1814), the domestic servant who at the age of forty-two declared that God had chosen her to announce His return. *A Woman to Deliver Her People* is the most comprehensive study of this remarkable woman and her movement yet written. Most contemporary observers dismissed Southcott as a fanatic, and she was frequently the subject of caricature and ridicule. James Hopkins attempts to remedy this distortion by examining Southcott's life and the millenarian movement she led within the context of the social, political, and economic crises of the period. By tracing the psychological and popular roots of Southcott's piety, and casting her appeal against the backdrop of a revolutionary age, Hopkins not only vividly portrays the life of this fascinating woman but also offers a new perspective on the mentality of ordinary English men and women

during the years of their transformation into a working class.

Neo-Baroque - Omar Calabrese 2017-03-14

A leading young Italian semiologist scrutinizes today's cultural phenomena and finds the prevailing taste to be "neo-baroque"--characterized by an appetite for virtuosity, frantic rhythms, instability, poly-dimensionality, and change. Omar Calabrese locates a "sign of the times" in an amazing variety of literary, philosophical, artistic, musical, and architectural forms, from the Venice Biennale through the "new science" to television series, video games, and "zapping" with the remote control device from channel to channel! Calabrese admits that he begins the book with a refusal to distinguish between "Donald Duck and Dante." Avoiding hierarchies or ghettos among works, he takes his readers on a fast-paced expedition through contemporary culture that closes with an elegant

essay on evaluation and classical form. According to Calabrese, the enormous quantity of narrative now being produced has led to a new situation: everything has already been said, and everything has already been written. The only way of avoiding saturation has been to turn to a poetics of repetition. The author shows that pleasure in texts is now produced by tiny variations, and a certain kind of citation from other works has taken on a central importance that would have been unthinkable only a few years ago. In describing this development, and others shared by both avant-garde and mass media, he makes us aware of the rapid shrinkage in the once ample space between "highbrow" and "lowbrow." The Lives of the Surrealists - Desmond Morris

2018-05-17

No other art movement in history has contained two artists as different as Magritte and Miró. This is because Surrealism was not in origin an art movement, but a philosophical strategy. It was a way of life a rebellion against the establishment that had given the world the hideous slaughter of the First World War. Instead of trying to analyse the work of the Surrealists, bestselling author and Surrealist artist Desmond Morris concentrates on them as people as remarkable individuals. What were their personalities, their predilections, their character strengths and flaws? Did they enjoy a social life or were they loners? Were they bold eccentrics or timid recluses? Drawing on the authors personal knowledge of the Surrealists, this book captures their life histories, idiosyncrasies and often-complex love lives, vividly illustrated with images of the artists and their works. The arts of

Surrealism were both spectacular and international, shaped by the darkest, most irrational workings of the unconscious. Shocking, witty and always entertaining, Morris tales illuminate the striking variation in approaches to the Surrealist philosophy, both in the artists work and in their lives.

Chapter 2 presents the two main methods of recording data, systematic recording and descriptive and narrative recording. The use of technological aids to recording is also reviewed. The British Surrealists - Desmond Morris

Here, bestselling author and surrealist artist Desmond Morris - one of the last surviving members of this important art movement - draws on his personal memories and experiences to present the intriguing life stories and complex love lives of this wild and curious set of artists. His vivid account is laced with his inimitable wit, and profusely illustrated by images of the artists and their

artworks. Featuring thirty-four surrealists - some famous, some forgotten - Morris's intimate book takes us back in time to a generation that allowed its creative unconscious to drive their passions in both art and life. With 105 illustrations

Minor Histories - Mike Kelley 2004-02-06

The second volume of writings by Los Angeles artist Mike Kelley, focusing on his own work. What John C. Welchman calls the "blazing network of focused confluences" from which Mike Kelley's styles are generated is on display in all its diversity in this second volume of the artist's writings. The first volume, *Foul Perfection*, contained thematic essays and writings about other artists; this collection concentrates on Kelley's own work, ranging from texts in "voices" that grew out of scripts for performance pieces to expository critical and autobiographical writings. *Minor Histories* organizes Kelley's writings into five sections.

"Statements" consists of twenty pieces produced between 1984 and 2002 (most of which were written to accompany exhibitions), including "Ajax," which draws on Homer, Colgate- Palmolive, and Longinus to present its eponymous hero; "Some Aesthetic High Points," an exercise in autobiography that counters the standard artist bio included in catalogs and press releases; and a sequence of "creative writings" that use mass cultural tropes in concert with high art mannerisms—approximating in prose the visual styles that characterize Kelley's artwork. "Video Statements and Proposals" are introductions to videos made by Kelley and other artists, including Paul McCarthy and Bob Flanagan and Sheree Rose. "Image-Texts" offers writings that accompany or are part of artworks and installations. This section includes "A Stopgap Measure," Kelley's zestful millennial essay in social satire, and "Meet John

Doe," a collage of appropriated texts. "Architecture" features an discussion of Kelley's Educational Complex (1995) and an interview in which he reflects on the role of architecture in his work. Finally, "Ufology" considers the aesthetics and sexuality of space as manifested by UFO sightings and abduction scenarios.

The Nature of Happiness - Desmond Morris 2004

What is happiness? Here, one of the world's foremost behavioral scientists tackles this age-old question. He shows that there are many ways of achieving happiness; for example, there is the inherent happiness that comes with the love of a child; the competitive happiness of triumphing over your opponents; the sensual happiness of the

hedonist. Rather than preaching a particular behavior or way of life, Morris provides knowledge that we can use, if we wish, to make ourselves happier.

Love Signals - David Givens 2006-01-10

A world renowned anthropologist explores the nonverbal signs, signals, and cues human beings exchange to attract and keep their mates. As a medium of communication, Love's silent language predates speech by millions of years. Today, we still express emotions and feelings largely apart from words. The postures, gestures, and facial cues of attraction are universal, in all societies and cultures. According to Dr. Givens, courtship moves slowly through five distinct phases: attracting attention, recognition phase, conversation phase, touching phase, making love. Since potential mates "test" each other before uniting as one, courtship is a choreographed give and take of signs granting

physical and emotional closeness. Love Signals is part ethnography and part how-to. Dr. Givens documents the little courting rituals witnessed in elevators, on subways, and in the workplace. He examines the essential role the face plays in courtship and how it can be optimally displayed. He decodes the body to find silent messages given off by shoulders, neck, arms, hands, waist, calves, ankles, feet, and toes. Dr. Givens analyzes expressive shapes, colors, and markings encoded in arm wear, shoulder wear, leg wear, and shoes. He deciphers the background messages of spaces, places and interiors to learn how environs help or hinder in the meeting process. Chemical cues emanating from aromas, tastes, steroids, sterols, and hormones strongly shape a partner's feelings, so they are explored as well. The book suggests ways to gaze, ways to read eyes across a room, and ways to sit, stand, align, walk dress, and lift a drink to

participate in the fascinating adventure of finding, winning, and keeping a mate. Knowing the unspoken vocabulary of love signals will give readers an edge. What this means for courtship is that the reader becomes able to read unspoken motives, emotions, and feelings with great clarity and precision. The more readers know about the nonverbal idiom of attraction, the more likely they will find a loving, lasting partner.

Postures - Desmond Morris 2019-11-05

This copiously illustrated book, by the ever-provocative Desmond Morris, is a pioneering and

lively exploration of the importance of body language in how we understand art. Every time an artist portrays a human subject, a decision has to be made about the posture of the figure. Will they be standing, sitting, or reclining? Smiling, screaming, or weeping? Never before given such dedicated attention, *Postures* argues that the gestures portrayed in a work of art can reflect the mores of a particular period in history, the customs of a certain culture, or a fashion in artistic styles. Exploring these with masterful subtlety, celebrated artist and anthropologist Desmond Morris uncovers fascinating

insights about changing social attitudes and conventions throughout history, finding surprising similarities and significant differences. Morris's vast selection of gestures, from the handshake to the glove-slap, are analyzed and grouped according to wider forms of communication—greetings, threats, insults, and more. All are illustrated with full color works, ranging from prehistoric masks and Greek statues to contemporary paintings and sculptures. *Postures* uniquely combines Morris's expertise in both art and social science, shedding new light on even the most familiar paintings.
